

GLIDE *Ride* HITCHHIKER

By *Demco*

Take the Shock out of 5th Wheel RV Towing.

U.S. Patent #5,851,021

The *Glide Ride* by Demco is a uniquely designed parallel linkage coupler that takes the jerks and jolts out of pulling on rough roads

Demco

DOING OUR BEST TO PROVIDE YOU THE BEST

The Glide Ride pin box takes the jack-hammer out of a rough road...

The unique linkage allows parallel movement, but gravity brings the king pin back to its original centered position.

... and transforms it into a ride as smooth as silk.

Without the *Glide Ride*, the bumps and jolts of the road put extreme stress on your RV and truck's drive train, suspension, body, and tires – that can result in costly repairs, shorter vehicle life and a very uncomfortable ride.

The *Glide Ride*...

- Absorbs bumps and jolts through a gravity, self-centering, parallel linkage system.
- Greatly reduces stress and fatigue at the hitch point.
- Is Maintenance Free
- Doesn't effect braking or steering.
- Helps prolong the life of your truck and RV.
- Makes a smoother more pleasant ride.
- Is available in several different pin box widths.
- Is rated up to 21,000 lbs. G.V.W.R.

You have to see it to believe it.

Call **1-800-543-3626** for a free video with no commitment. You'll observe how the *Glide Ride* can work to make towing your heavy camper a pleasant experience.
