Contessa Means Luxury and Value.

Experience a sophisticated lifestyle in the 2001 Contessa from Beaver Motor Coaches. Royal refinements include ceramic tile floor, sculpted carpeting, solid hardwood cabinetry, 21st century electronics, functional slide-out rooms and a rock solid Magnum™ chassis. Contessa makes it possible to live your dreams in luxury and style.

Beaver meticulously combines the richness of solid hardwood cabinetry with designer appointments in window surrounds, bedroom fabrics, and sculpted carpet designs. In addition, spacious floor plans and an impressive list of options allow for the personalization of Contessa to your lifestyle. Behind the wheel and down the road, Contessa proves that it

is a marvel of engineering skills and manufacturing techniques resulting in a coach of distinction and luxury.

Comfort, space and luxury captivate the senses upon stepping into Contessa. Enjoy the buttery soft feel of the optional UltraLeather™ cab seats from Legacy™. These seats are, without a doubt, the most comfortable found in any motor coach. When you are ready to stretch out, simply press the button to activate the slide-out room in the living area or optional bedroom area and within seconds, increase your living space. Beaver slide-outs are so well engineered that you will want to invite your friends over just to impress them with the ease of operation and the extra space created.

Relax and Enjoy . . .

Designed for a lifetime of living, Contessa features spacious living and resting areas. Fountainhead™ countertops are beautiful and easy to maintain. Generous cabinet storage areas provide the space for life's necessities.

Optional convenience appliances such as an on-board washer and dryer combination or a 12 cubic foot refrigerator with icemaker truly make this your home. The optional HydroHot™ hydronic heating and hot water system will provide unlimited amounts of domestic hot water as well as quiet, non-drying heat.

With the day drawing to a close, you will find the on-board entertainment systems in the Contessa a true delight. The standard Sony® and Cambridge® surround sound home theater adds the realism to movies that are delivered via a VCR, DVD or optional satellite system. A 10 disc Sony® CD changer / player allows you to mix the music exactly to your liking. Two 20" remote control color televisions round out your choices for entertainment.

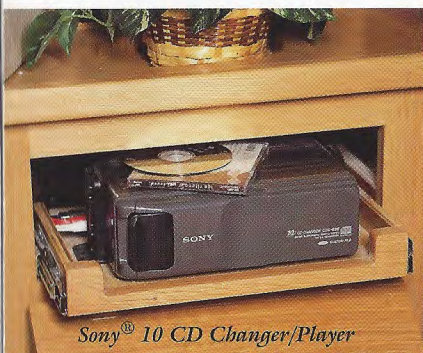

A large kitchen with plentiful counter space and bountiful storage space are hallmarks of every Contessa. A Princess™ cooktop is at your fingertips to provide the convenience of cooking with gas. A true gourmet also appreciates the micro-convection oven that can assist in creating a snack or a full course dinner.

Upon reaching your destination, you will truly enjoy the limited amount of work required. Simply press a button to extend the slide-out in the living and kitchen area or the optional slide-out room in the bedroom. No clamps, braces or locks to worry about! Press a few more buttons and Contessa automatically levels itself. Four hydraulic rams that are mounted on the frame of the coach use the axles as leveling pads. Truly revolutionary, Contessa's four point leveling system gives you the largest footprint to create the stability you want and need.

Custom crafted dash panel

Because your home is mobile, you want the best, most solid foundation possible. The foundation Contessa relies on is the Magnum B-Series chassis that features a patented, mathematically optimized air suspension. This 9", schedule 50 steel, raised-rail design is the strongest in the industry. Weight distribution is also important. The B-series chassis is calibrated to keep almost 70% of the total weight of the coach at the floor level or below. The result is an easier handling vehicle in high wind and tight curve situations.

Contessa is completely wrapped in a fiberglass shell. From the single piece, fiberglass roof, to the exterior sidewalls, this surface is designed for maximum durability and

ease of maintenance. Beautiful exterior graphic designs are carried through in the multi-step painting process that is capped off with a layer of clear coating to enhance the paint colors and provide a high gloss finish. Smooth, distinctive and refined, Contessa stands above all others.

Contessa features electronic monitors to help make life more comfortable. A dash mounted VMS 200EL™ monitor keeps track of engine performance, trip information and includes a theft deterrent feature. Statistical information on holding tank status, battery level and generator hours is made available through the CMP II™ panel. These exclusive items give you the most information available about the functions of your total home.

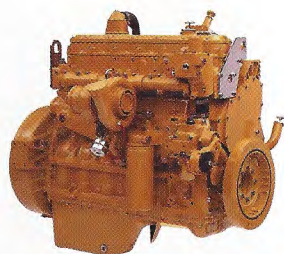

VMS 200EL monitor panel

Girard Automatic Armless Awning

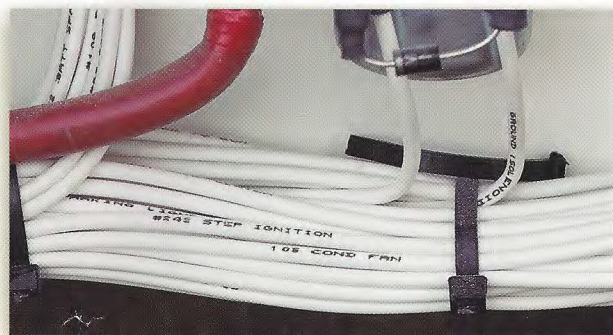

A press of the button will extend the Girard® automatic armless awning. This awning is so smart that it will automatically retract if winds exceed 21 mph for more than a minute.

Contessa is built on a sure-footed Magnum air ride chassis. Power comes via the Caterpillar® 3126B turbo diesel engine rated at 330 HP and 860 ft. lb. of torque.

Combined with the Allison® 3000MH transmission, no other combination gives you the power, performance and ease of handling that you will find in Contessa.

Every Magnum chassis is backed by a solid three-year warranty. Your purchase is further backed by Rapid Response™ roadside service for any emergencies that might arise in your travels. Ask your deal-

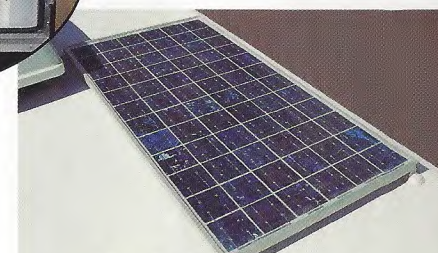

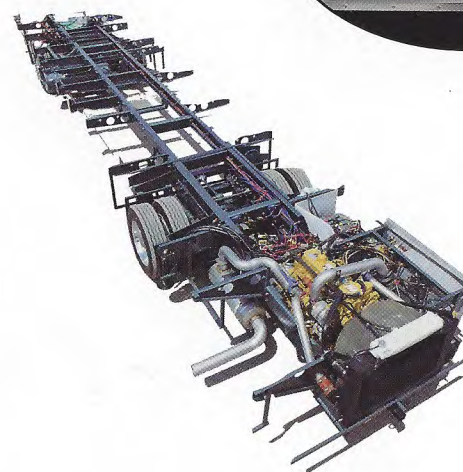

Every Contessa has thousands of feet of wiring to supply power for lights, entertainment features, turn signals as well as all the other features in the coach. ED&A, a SMC division, supplies Beaver with harnesses that are computer checked prior to installation. If you closely examine the wiring in the electrical bay, you will discover that each wire has been individually printed with the circuit it supplies. No more guessing what color-coded wire supplies power to which item.

er for more information about the Magnum chassis and warranties available on other components.

Optional Hydro-Hot Heat & water system

Standard 100W solar panel

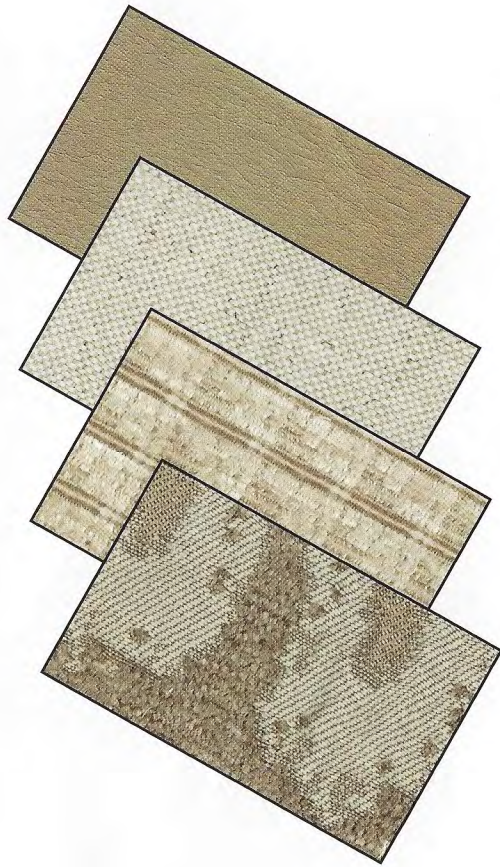

Optional 7.5KW Onan diesel generator

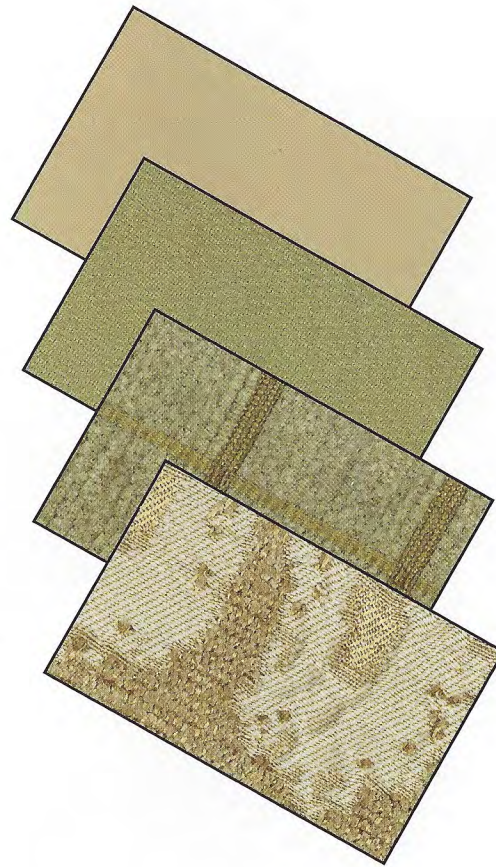

Engine command center

Specifications for the Contessa are available as a separate publication from this color brochure. Due to constant changes and refinements of our product, specification sheets are published with the most current information. Floor plan information is also available as part of the specification sheet. All specifications are subject to change without notice or obligation. Final confirmations on factory orders will supersede published information. Beaver Motor Coaches uses real hardwoods. Natural variations in shade, grain, pattern and color can be expected as a natural characteristic of any wood. These variations are not considered defects and serve to enhance the beauty and character of the cabinetry.
