NO ONE GROWS THEM LIKE THIS ANYMORE. MEET OUR FAMOUS SUPERSTRUCTURE

The lite-aluminum Superstructure that a Titan and Solanta trailer is built upon is by far the strongest, most advanced and integrated system in the industry. Others may try, but its design and manufacturing have never been duplicated.

A THICKER, MORE SOLID FLOOR

The industry's best: Plush, 25-ounce carpet with pad; residential-quality vinyl; 5/8" tongue-and-groove, exterior-grade plywood; insulation; thick poly weather barrier and aluminum framing make up our flooring.

EASY ACCESS

All trailers have easy access to hook-ups and service locations.

MORYDE[®] IRE SUSPENSION

Most Titan fifth wheels come with a standard Moryde IRE suspension. This is the smoothest ride.

THE BEEFIEST FRAME

All of our frames feature rugged box steel. Titan fifth wheels, however, are 16" deep at the central frame - strongest in the industry!

SMOOTHER RIDE

Most models feature standard shock absorbers for easier towing.

THE VIEW FROM BELOW

First you'll notice the ease of access to holding tanks (they're enclosed and heated), then be amazed! Most Titan fifth wheels have a standard enclosed underbelly!

SEALED BEARINGS

Our Dexter[®] Nev-R-Lube units utilize sealed-bearing axles (standard on Titans).

COMPONENTS

From framing to interior walls to aluminum roof trusses, each component is made of top-of-the-line materials.

LITE-ALUMINUM SUPERSTRUCTURE

For years, we've been building the industry's premier aluminum structure. We are the original. Ours is still screwed and bonded together, which allows for some flex so it won't crack like welded frames. And notice how much aluminum we use compared to others!

INSULATED TANKS

Some of the others try this, but they don't heat and insulate the valves. We, however, think about the details.

A SOLID STRUCTURE

Everything about our trailer is stronger and better. Even slide-room roofs are made to withstand years of use. Don't try this at home.
