

Fuse

WINNEBAGO

Why Fuse?

- Two functional floorplans
- Soft-touch Primera® furniture
- Contemporary, fun, and affordable with features that support active owners
- Available bike rack
- Powered, armless patio awning with LED lighting
- Ford® Transit diesel cutaway chassis
- Ford SYNC® 3 Navigation with Lane Departure Warning System
- Flex Bed System (23A)
- Optional solar panel/battery charger system

On the Cover: 23A Magnetic Deluxe Graphics

23A Spark with Glazed Driftwood Cabinetry

Fun Meets Affordability

The Winnebago® Fuse™ proudly introduces the Ford® Power Stroke® diesel to America. This third generation high-performance engine has proven its worth overseas and is ready to put its 185-horsepower and 15-17 miles per gallon to work for you. It's a fitting chassis for a fun, contemporary Class C coach designed for active owners. Two floorplans each provide multiple, flexible sleeping spaces, wardrobe cabinets

and a full galley. And, while the Fuse is a budget-friendly coach, several premium features such as the FROLI® Deluxe Sleep System (23A), 6" multifunctional cab stereo/display, and a Carefree® Latitude patio awning come standard. You'll also enjoy the entertainment center with an HDTV tucked above the cab. See what happens when fun meets affordability in the Winnebago Fuse.

2016 MotorHome
READERS' CHOICE
WINNER
Class C

23A Spark with Glazed Driftwood Cabinetry

We put fun front and center with an entertainment center above the cab that boasts an HDTV, CD/DVD player, and AM/FM stereo all controlled by a handy remote. Take in your favorite movie from comfortable bench seats in the 23T or the TrueComfort+ sofa in the 23A. Both seating options are covered in soft Primera fabric that is beautiful and durable. Convenient USB ports in the lounge and bedroom allow you to keep your phones powered at all times. It's all part of the Fuse's mission to combine fun and functionality into an affordable coach that you'll be proud to call home.

23A TrueComfort+ Sofa

Passenger Seat Reclined

23A Galley

A decorative backsplash and sliding cabinet doors sourced in the USA bring contemporary style and sustainability to the Fuse. The 23A presents a very user-friendly workspace with a microwave/convection oven, two-burner range, covers for the sink and range, and a flip-up countertop extension. In the 23T, a microwave, three-burner range, and an available oven make any meal possible.

23A Full-Extension Drawers

23A Sink

23A Range

23A Microwave/Convection Oven

23A Range Cover

23A Bedroom

The 23T is designed to make travel comfortable for multiple couples with a queen bed slideout and the Flex Bed System that converts the front seating areas into a large sleeping space. The 23A offers the full flexibility of the Flex Bed System, allowing you to switch between two twin beds or a large queen bed depending on your needs. Add the available HDTV and the bedroom becomes a second hangout room. A wardrobe and a compartment under the bed provide ample storage space.

Dash

Ergonomically designed and safety inspired, the Ford Transit chassis offers a comfortable ride and one of the clearest views of the road. It is the first American motorhome powered by the Ford Power Stroke diesel engine, delivering 15-17 MPG on the highway and the ability to run on diesel or B20 biodiesel. Inside, the MyFord® Touch system features SYNC® 3 technology for your wireless devices and a 6" display for navigation and SiriusXM® satellite radio control. A built-in lane departure warning system keeps you on the right track. When parked, the passenger seat can be turned to face the lounge.

Cab Seats

Ford SYNC 3 System

23A Powered Patio Awning

The Fuse complements your active lifestyle with a lighted rear storage compartment for your outdoor gear along with an available bike rack. The Carefree Latitude powered patio awning extends quickly and effortlessly so you can focus on selecting the music for the built-in exterior speakers. Get set up quickly with an all-in-one service center for your water and drainage connections. A heated drainage system is available to extend your travel season into the colder months.

Stainless Steel Wheel Liners

Fiberglass Roof
The one-piece fiberglass roof is backed by a 10-year limited parts-and-labor roof skin warranty.

Laser-Cut Tubing Precision laser cutters create precise joints in structural steel that are stronger and require less welding.

Interlocking Joints Specially engineered interlocking joints connect the floor, sidewalls, and roof where competitors often rely on simple screws to bear the weight.

Thermo-Panel® Sidewalls
By layering fiberglass and high-density block foam insulation with welded aluminum support structures, we create some of the industry's strongest, most durable and lightweight sidewalls.

Embedded Steel Metal substructures embedded into the sidewall provide solid attachment points to keep cabinets and appliances mounted securely in place.

E-Coating An electrodeposition coating helps protect critical steel components.

Solid Framework Structural extruded aluminum creates an extremely strong solid frame.

SUPER STRUCTURE®

BUILT TO LAST

Every coach—from our smallest Class C to our largest diesel-pusher model—is built to Winnebago's® legendary SuperStructure® construction design. It's a process developed and refined over more than 50 years of building some of the strongest, most durable coaches in the industry.

TESTING Before rolling out of our factories, every coach undergoes an extensive 113-point inspection. Each coach also passes a high-pressure water test that simulates rain at a rate of 50-inches per hour to check for leaks. During the design process, our computer simulations, physical testing center, and rigorous test track ensure each model is built to last.

DETAILS At Winnebago, we treat the features you can't see with the same care as the ones you can. Look in the access panels of some of our competitors' coaches and you'll see loose insulation and wires haphazardly strewn about. Winnebago maintains a clean fit and finish throughout so your coach will last for the long haul.

BUILT IN-HOUSE We process and finish key aluminum parts. We rotocast our own plastic components. In fact, we manufacture most of our own parts so they are designed to fit the space, rather than fitting the space to an awkward off-the-shelf component size.

Ground fault interrupter

Warranty⁶

12-month/15,000-mile basic limited warranty⁷
36-month/36,000-mile limited warranty on structure⁷
10-year limited parts-and-labor warranty on roof skin⁷

FOOTNOTES

1. The height of each model is measured to the top of the tallest standard feature and is based on the curb weight of a typically equipped unit. The actual height of your vehicle may vary by several inches depending on chassis or equipment variations. Please check with your dealer for further information.
2. The load capacity of your motorhome is designated by weight, not by volume, so you cannot necessarily use all available space when loading your motorhome.
3. Capacities are based on measurements prior to tank installation. Slight capacity variations can result due to installation applications.
4. Capacities shown are tank manufacturer's listed water capacity (W.C.). Actual filled LP capacity is 80% of listing due to overfilling prevention device on tank.
5. Actual towing capacity is dependent on your particular loading and towing circumstances which includes the GVWR, GAWR, and GCWR as well as adequate trailer brakes. Please refer to the Operator's Manual of your vehicle for further towing information.
6. See separate chassis warranty.
7. See your dealer for complete warranty information.

NA Not Available

Not all items available in combination. See dealer for details.

Winnebago's® continuing program of product improvement makes specifications, equipment, model availability, and prices subject to change without notice. Published content reflects the most current product information at time of printing. Please consult your dealer for individual vehicle features and specifications.
