

INTRODUCING
ARKA

Turn nowhere into somewhere.

The all-new Winnebago ARKA is built for those who don't stop where the road ends. With true off-road capability, all-season performance, and the comfort to recover and go again, it's your basecamp for deeper, longer, more independent adventure.

Built for the Backcountry

- **Purpose-built for off-road performance**, with optimized approach, breakover, and departure angles; a four-point articulating box-to-chassis mount; and a clean underbody.
- **Durable exterior construction** with a full-body coating, integrated branch guards, and a molded, one-piece fiberglass roof designed to shed water.
- **Built to carry and tow serious gear**, with a 15,000 lb towing capacity, 1,500 lb tongue weight, and a rear gear garage with an integrated L-track system.

Comfort + Versatility

- **True all-season performance from -10°F to 120°F**, with hydronic heating, heated floors, and high-efficiency insulation that performs when conditions don't cooperate.
- **A quiet, controlled interior lounge** includes a full galley, aluminum cabinets with select lockable compression latches, soft overhead bag storage compartments, and easy-to-clean surfaces.
- **Modular living spaces** include a versatile dinette that flexes from storage to work to sleep modes, a hidden shower and cassette toilet, and a cabover bunk that converts from twin beds to a queen to a king-sized WinnSleep® bed.

Go Further. Stay Longer. Stay Connected.

- **Extended off-grid capability for up to 14 days**, with ample tank capacity, 800W of solar power, and up to 16.8 kWh of lithium battery capacity with dedicated alternator charging.
- **Winnebago Connect™** smart control system gives you mobile visibility and command of your power, climate, tanks, locks and pet security—on or off the grid.

RUGGED WHERE IT COUNTS. REFINED WHERE IT MATTERS.

Not overbuilt for show. Not underbuilt for backcountry realities. The ARKA strikes the ideal balance, delivering real capability and real comfort wherever you go.
