**Notes:**

Note #1: Gross Vehicle Weight Rating (GVWR) means the maximum permissible loaded weight of the motorhome.

Note #2: Gross Combined Weight Rating (GCWR) means the value specified by the motorhome manufacturer as the maximum allowable loaded weight of the motorhome with its towed trailer or towed vehicle. Towing and braking capacities may differ. Refer to Fleetwood and chassis manufacturer manuals for complete information.

Note #3: Unloaded Vehicle Weight (UVW) means the weight of a vehicle, without options, with maximum capacity of all fluids necessary for operation of the vehicle, but without cargo, occupants or accessories that are ordinarily removed from the vehicle when it is not in use. Weight varies significantly based on options.

Note #4: Overall lengths taken from front bumper to rear bumper.

Note #5: Capacities shown are tank manufacturer’s listed Water Capacity (WC). Actual filled LP Capacity is 80% of listing due to safety shut-off required on tank.
