

Checked the weather lately? There's a big Storm heading this way.

How does the new Storm manage to offer so many of the finer things associated with higher-end motor homes for such a modest price? We start with the basics. Fleetwood's Power Platform II with an advanced chassis design results in greater structural strength and a smoother ride. Then we add a restyled fiberglass front cap and an expansive automotive-bonded windshield for an impressive view from both inside and out. We didn't stop there—we addressed the interior with the same panache, including hardy alder wood cabinetry, dovetail drawer construction, and day/night shades for enhanced intimacy. The driver's compartment is built for convenience, featuring a map storage area, telephone power port and improved lighting. Adding them all up, it's easy to see why Storm's features, options, and designs make it the clear favorite as Fleetwood's most affordable wide-body motor home in any kind of weather.

Product information and photography included in this brochure were as accurate as possible at the time of publication. For the most current product information and changes, please visit our Website at www.fleetwood.com or contact your local Fleetwood dealer. Subsequent refinements may be evident in the actual product. Prices and specifications are subject to change without notice. All fuel and liquid capacities are approximate and dimensions are nominal. Fleetwood has designed its motor home brands to provide a variety of potential uses for its customers. Each unit features the optimum storage, fluid, seating and sleeping capabilities. Though the customer enjoys this potential, he/she also has the responsibility to select the proper combinations of loads without exceeding the chassis weight capacities.

New Southwind Storm Features For 2000

Our engineering may set us apart from the rest. But the things you'll notice most, when you and your family take a trip, are the top-of-the-line features. This year we have, once again, added to an already large list of features with the following:

- Power Platform II
- Automotive Bonded Windshield
- Restyled Fiberglass Front Cap and Lower Fascia
- Driver's Compartment Features a Convenient Storage Area for Maps and a Multi-Use Power Port
- Dovetail Drawer Construction
- Day/Night Shades

2000 Southwind Storm Options

The Power Platform II Makes The Difference

Southwind Storm's quality begins long before the features come on board. We begin by building on our exclusive Power Platform II, a unique truss design welded together using tubular steel that's durable, strong, and dependable. The result is a quiet and nearly flawless ride, increased floor strength, and substantially more storage space below. An all-steel foundation further reduces stress loads on the sidewalls and minimizes chassis flex on uneven roads.

- 1. GVWR (Gross Vehicle Weight Rating): Means the maximum permissible weight of this motor home. The GVWR is equal to or greater than the sum of the unloaded vehicle weight plus the net carrying capacity.
- 2. GAWR (Gross Axle Weight Rating): Means the maximum permissible loaded weight a specific axle is designed to carry.
- 3. Base Weight: Means the weight of the motor home without fuel, options, water, cargo, or passengers.
- 4. GCWR (Gross Combination Weight Rating): Means the value specified by the motor home manufacturer as the maximum allowable loaded weight of this motor home with its towed trailer or towed vehicle. Towing and braking capacities may differ. Refer to Fleetwood and chassis manufacturer manuals for complete information.
