

#### Greetings,

By utilizing our customer's wants, needs and desires as the foundation of our design, Sprinter has quickly become one of the top selling brands in America. Customers have returned time and time again to Sprinter, because of Sprinter's higher value, innovative floorplans, and array of features and amenities that were previously offered exclusively in high-line products.

Simply put, Sprinter offers more value for your dollar than any other brand in the recreational vehicle industry. Our goal is to carefully listen to you, the RV enthusiast, and incorporate much of your feedback into our products. As styles change and technology advances, we work to continuously make Sprinter the most comfortable, convenient, and relaxing RV on the road. We invite you to join the tens of thousands of satisfied Sprinter owners. Thank you for your consideration.

See you in the Great Outdoors,

General Manager

Above, Sprinter's 299 RLS floor plan in the Azalea color scheme shows the comfortable extra-large slideout room with flush floors. Notice the hardwood, raised panel cathedral-style overhead cabinets, the soft lines of the residential quality upholstery, the designer window treatments, and the attention to detail in the cabinetry of the entertainment center. We include both 12-volt and 110-volt lighting in all Sprinter slideouts. This allows you to camp wherever you want to go—and not be left in the dark.

#### SPRINTER E-Z TOW TRAVEL TRAILERS

244 TB

248 RB

249 RKS

The 2002 Sprinter E-Z Tow has all of the features of our standard Sprinter. In addition, the profile is sloped to provide improved aerodynamics. The results—great space with E-Z towability. The name says it all, Sprinter "E-Z Tow."

## SPRINTER "HP" FOR EXPERIENCED RV'ERS

All Sprinter "HP" Fifth Wheels are high-profile models with standing room in the bedrooms. Our exteriors feature fiberglass side-walls and an optional state of the art fiberglass front cap that was designed with the latest technology in wind resistance. Sprinter "HP's" sleek design improves towability. Another feature that provides improved towability is our tubular aluminum welded sidewall frame and our six-layered laminated sidewall process which provides a lightweight, well-insulated fifth wheel with uncompromised structural integrity. Sprinter "HP" is a fifth wheel with advanced construction designed for the experienced RV'er. at the price of a conventionally built RV.

Sprinter "HP" in layer laminated collection.

Light yet durable — Sprint HP's" fully welded aluminum sidewall.

#### SPRINTER CONSTRUCTION

**BUILT WITH INTEGRITY...** 

from the inside out.

Cambered steel frame with extra supporting outriggers under every Sprinter RV.

One-piece, seamless, 5/8" floor deck with a 25-yr. mfr.'s warranty.

Rubber roof (12-yr. mfr.'s warranty) rolled over side and rear walls to eliminate seams and prevent potential leaks.

Fully-decked roof on trussed rafters, a full 5" thick, providing an R-11 insulation rating.

Easy-opening entry steps with extra-low first step.

Taller, wider entry door, radius corners.

Outside storage doors.

Welded aluminum supports in all raised-bath fifth wheel decks provide strength and rigidity in all critical high-stress pas.

"Space-Maker,™" Sprinter's underfloor fresh-water system, is located in a heated compartment to resist freezing. This frees up usable space and lowers the center of gravity for easier towability of your Sprinter.

#### SPRINTER VALUE

Sprinter value happens because we focus on the manufacturing process. We put the dollars that many companies spend on large advertising campaigns, executive benefits, and costly office complexes into improving our products. We also strive to increase our manufacturing efficiencies while maintaining high quality. We achieve this high level of quality by employing a workforce from a community which still values craftsmanship. Finally, we listen to our Sprinter customers across the country. We learned a long time ago that great ideas come from the people who use our products daily. We appreciate and value this input and have implemented many of these ideas into our products.

The result of these efforts has been dramatic. Sprinter recreational vehicles are now seen everywhere—on the Interstates, on the Trans-Canadian Highway, from the Rockies to the Everglades, in just about any camping resort or national park you enter in the U.S. or Canada. We welcome you to join the Sprinter family of travel trailers and fifth wheels, where quality, comfort, and function meet.
