Safari Line
Safari Sport, Safari & Special Edition

Wherever you go, whatever you do, there you are. It's simple.

Shown with optional exterior decal.

We offer the Safari Travel Trailer in three configurations: Safari Sport, Safari, and Safari SE. Lightweight and rugged, each has something special to recommend it to you, whether you're a first-time Airstreamer or a seasoned veteran of the road. Every inch of an Airstream Safari has a functional purpose, and not one of those inches was built for planned obsolescence. You can buy a Safari today and join the thousands of Airstream owners still driving the original models they purchased. Two thirds of the Airstreams ever made—since the 1930's—are still on the road.

Safari Sport:

Safari Sport is an exciting new lightweight and lower cost addition to the popular Safari family, available in two easy-to-handle lengths — a 17' and a 22'. The Safari Sport has been configured from the ground up to be lightweight and easy to use — the perfect first Airstream for those new to Airstreaming, and an excellent choice for those new to the RV lifestyle altogether. The Safari Sport features convertible beds and can be towed by most smaller and midsized SUVs. Where will you go first? Get out the maps, or just swing into traffic and head wherever your mood takes you. There's no better way to begin your life of adventuring than with a Safari Sport.

Safari:

The Safari is everything you need in a travel trailer...at a very down-to-earth value. Safari gives you complete independence on the road. It's roomy on the inside yet gracefully compact on the outside. The Safari is lightweight, maneuverable, and yet battleship strong. Safari trailers don't sacrifice comfort or conveniences for quick and easy travel. They're the benchmark for economy and efficiency. Whether it's a week canoeing in Minnesota's Boundary Waters or three nights at the Monterey Jazz Festival in Northern California, your Safari will take you there.

Safari Special Edition (SE):

And then there's the Safari SE, which combines the ruggedness of the Safari and design features such as riveted panoramic windows, interior aluminum skin, and recessed halogen lighting. The look is both understated and modern, perfect for the traveler who understands that being away from home doesn't necessarily have anything to do with roughing it.

Go ahead—chase the horizon. Or unhitch your Safari and practice the long-forgotten art of relaxation.

Exterior:

Rugged on the road. The Airstream Safari's design embodies nearly 80 years of engineering expertise: the finish a result of Airstream's long experience on the highways and byways of the world. Our engineers design, refine, and make innovations in collaboration with Airstream owners world-wide who have been helping Airstream field-test products since the 1930s.

The Safari's silver curves make a lovely reflective surface for moonlight, but they're not just for looks: the aerodynamically-shaped exterior design lowers wind resistance —requiring less horsepower and approximately 20% less fuel than conventional box trailers. Monocoque construction, ultralight materials, and a low center of gravity make towing the Safari a dream.

Those curves don't mean we've cut any corners, either: nothing has been spared to create a living space that lets you relax in spaciousness and comfort. Whether you're following a balloon race in New Mexico or spending a week off-road in Idaho, no other travel trailer comes close to creating this satisfying residential living environment.

Like other Airstream Travel Trailers, the Safari is self-sufficient, so you can park it anywhere and stay awhile. Its water and fuel tanks, water heater, and furnace are seamlessly integrated into the body of the trailer, to maintain the Safari's aerodynamic shape.

Airstream's founder, Wally Byam, used to say there was no point staying home in the rocking chair. We couldn't agree more. If you've got to have one on hand, just bring it with you! With or without it, get ready for adventure and spontaneity in a Safari.

Interior:

The Safari's interior surfaces (wood, vinyl, aluminum, and laminate) are attractive, hard-wearing, and easy to clean. Its well-appointed galley — with a sealed-burner cooktop, microwave option, and stainless steel sink with cover — easily accommodates pre-dawn poached eggs and wheat toast for two, or an after-rock-climb paella and sangria for six. Roomy storage cabinets keep all your belongings in order. Comfortable beds cushion you after a hard day of adventure and encourage a solid and restful night's sleep. The Safari can also help you stay in touch with the modern world through up-to-the-minute communication and entertainment features: telephone hookups, satellite pre-wire, and premium audio packages.

The Safari SE model comes with aluminum-framed windows that are riveted into the shell. The glass is tempered safety glass with tint and UV inhibitors. Your Safari SE will give you incredible panoramic views from the inside, and the plentiful windows maximize the interior's light and expand its sense of spaciousness. One of the most appealing things about these windows is that they truly bring the outdoors inside. The expansive windows also provide excellent airflow when they're open. Another feature of the Safari SE is our Vista View windows. These smaller windows are positioned near the top of the Airstream to bring you privacy without darkness.

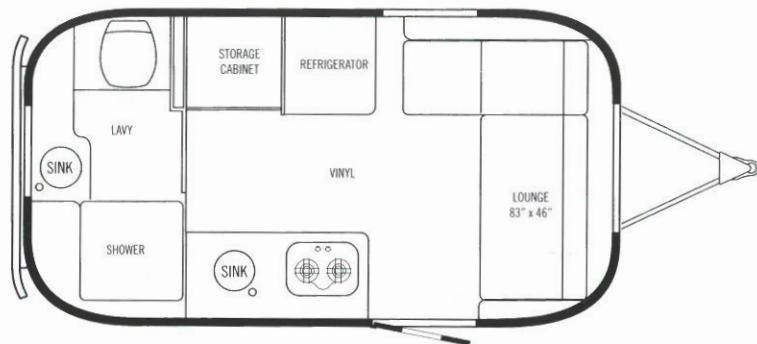

Hidden inside the Safari's walls, but crucial for traveling comfort, is our residential-type 2.5" fiberglass batten insulation, which keeps the interior cool in the summer, warm in the winter, and quiet all year around. All Airstreams are completely insulated, including the floor and holding tanks.

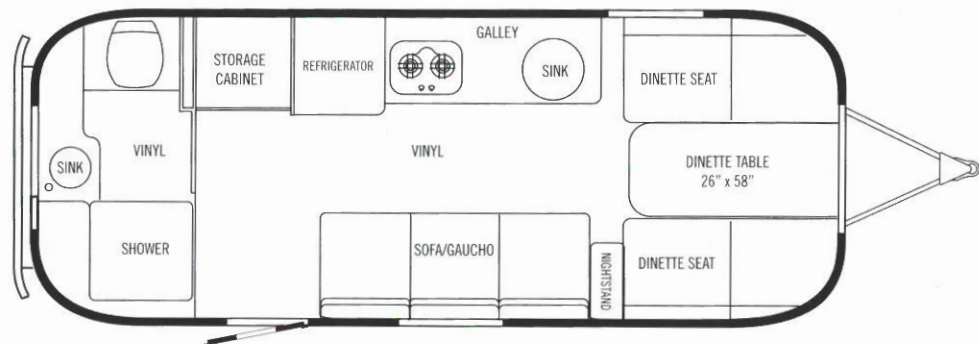

Chose from several different interior decors to create the kind of environment that will make you feel most at home. And then, hitch up and go anywhere. At the end of the day, no matter where you are, you've arrived. Step inside. Take a deep breath. Welcome home.

Product information, specifications, and photography in this brochure were as accurate as possible at time of printing. Photographs may contain some features that are optional on your vehicle. Since we continually strive to improve our products, actual products may differ. Prices and specifications are subject to change without notice. All capacities are approximate and dimensions are nominal. Some features or options may be different or unavailable in Canada.

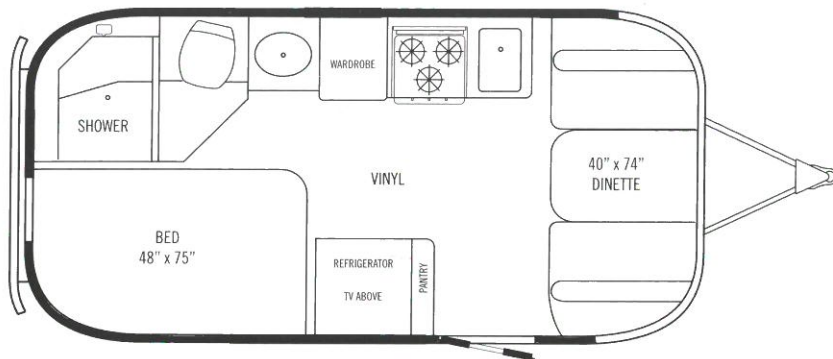

Vehicle Loading — Every effort has been made to provide the greatest number of options for the recreation vehicle owner. Along with these choices comes the responsibility to manage the loads that are imposed by the choices so that they remain within the manufacturer's specified chassis weight limits. Do not overload the recreation vehicle.

Dry Weights — Based on standard features; optional equipment not included. Net carrying capacity (NCC) determined by subtracting unloaded vehicle weight (UVW) from gross vehicle weight (GVWR) and includes fluids, options, and cargo. Liquid capacities and weights are approximations only.

Warning — This information is intended as a guide only. Weights of individual vehicles may vary. Consult your owner's manual for complete loading, weighing, and towing instructions.
