PERFORMANCE IS POWER

Open the throttle and feel it for yourself. Featuring supreme cornering and some of the highest horsepower ratings on the market. Captain your own adventure. The water is yours.

RULE IT.

TWIN ENGINE PLATFORM

BENEFITS

Rated for up to 700 HP, the highly-developed twin engine platform advances performance to the next level with added maneuverability, faster holeshoot, and higher top end speeds. Depending on which Harris model you choose to add it to, the platform allows for a top speed of over 60 miles per hour.

ADVANCED TECHNOLOGY

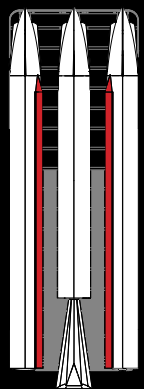

Finesse into tight dock slips with ease or maintain your position regardless of the current. Add "JoyStick" piloting to the twin engine platform for subtle maneuvers. With Harris' patented transom design the dual engines can move independently to maintain the position and heading set by the GPS-based digital anchoring and Waypoint auto heading systems.

SUPERIOR DESIGN

The performance gains from the twin engine platform result from unique tapered tubes, a lifting strake design modeled after a v-hull's shape, and a unique fuel system. The three pontoon tubes taper from 25" to 27" in diameter from bow to stern to maintain the boat's center of gravity despite the additional weight from the dual engines. A forward mounted, single 100-gallon fuel cell in the center tube ensures equal weight distribution.

SP LEVEL I SPORT PACKAGE

BENEFITS

Impressive increase in weight and horsepower capacity, more stability for a smoother ride and greater fuel economy.

25" DIAMETER CENTER TUBE

The 25-inch center tube provides greater weight and person capacity, as well as higher horsepower capacity than a two tube pontoon boat.

LIFTING STRAKES

Unique, high strength aluminum lifting strakes with a custom profile are strategically added to the tubes to provide extraordinary lift that results

in quick planing, increased top speeds and minimal bow rise. Located on the inside of the outside tubes, maneuverability is never compromised.

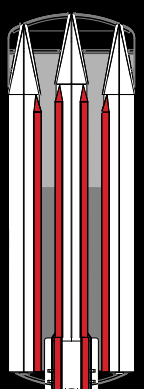

ALUMINUM SKIN KIT

The skin kit reduces drag from exposed cross-members, providing better fuel economy when at speed.

WELDED KEEL

A full-length keel, from bow to stern, on each of the three tubes cuts the water for a smooth ride by breaking surface tension as well as keeping the boat on a straight track.

P+ LEVEL II PERFORMANCE PACKAGE PLUS

BENEFITS

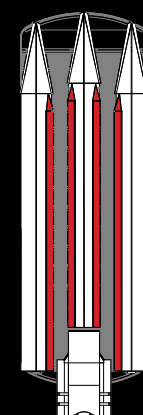

The Performance Package Plus adds to the Sport Package increased buoyancy to boost performance, greater control at the helm plus an overall smoother ride at any speed.

FULL-LENGTH CENTER TUBE

The center tube extends all the way to the motor pod to add even more strength and buoyancy, while also creating more control at the helm. Fuel capacity increases to 40 gallons.

ALUMINUM SKIN KIT

A flat underdeck reduces resistance and drag caused by exposed cross-members. This dramatically increases speed and time to plane. The skin kit coverage varies by model and performance package.

P3 LEVEL III PERFORMANCE III PACKAGE

BENEFITS

Increased speed, improved handling, quick to plane, impressive holeshoot, greater fuel capacity and higher horsepower ratings—up to 350 HP—are all integral aspects of the Performance III Package.

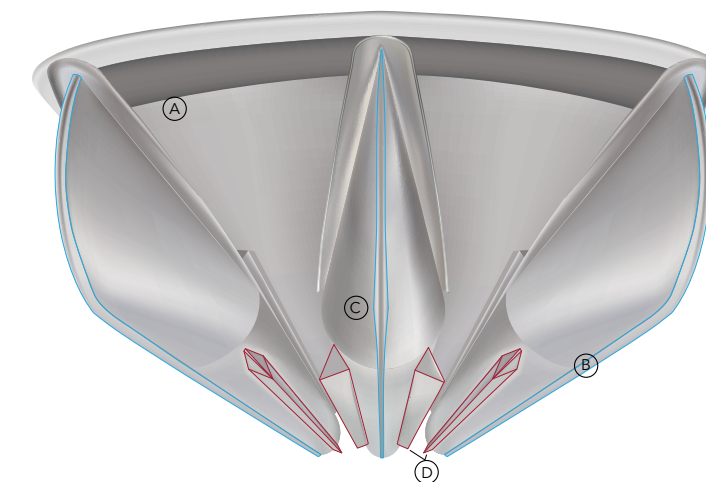

V-HULL DESIGN

The 25-inch center tube is lowered a full inch, creating a V-hull design to

carve through the water for increased control and drag reduction.

INTEGRATED MOTOR POD

The Performance III Package boasts the longest running surface which translates into a smoother, more controlled ride with maximum stability. It also features a larger, reinforced integrated 50-gallon fuel tank.

Harris Performance Packages are all-inclusive (skin, strakes and center tube) to ensure you have the best on-water enjoyment and performance.

- A. Aluminum Skin Kit
- B. Full-length Keel
- C. Lowered Center Tube
- D. Lifting Strakes

LIMITED LIFETIME STRUCTURE WARRANTY

We're so confident in the quality of Harris pontoons that each owner receives a Limited Lifetime Structure Warranty, covering the pontoon tubes, cross-members, decking, motor mount, fence rail, and other structural pieces responsible for keeping you out on the water.

BOW-TO-STERN WARRANTY

We built your pontoon to last. That's why we ensure complete coverage for five years, including all materials and workmanship. Additionally, the engine is covered by the manufacturer's warranty. In the event of a warranty claim, your Harris dealer will personally help you through it. Your satisfaction is our number one priority.

A LEGACY OF SATISFACTION

For 13 consecutive years, Harris has received a Consumer Satisfaction Index (CSI) Award from the National Marine Manufacturers Association. This honor recognizes us for achieving an "excellent" rating in consumer satisfaction from independently-surveyed Harris owners. We're proud to be NMMA certified, but prouder knowing our customers are satisfied.

INNOVATION AWARD

Harris proudly accepted the 2013 NMMA Innovation Award for its all-new Crowne model line. The NMMA Innovation Award honors manufacturers and suppliers who bring to market outstanding new and innovative products for the boating industry.

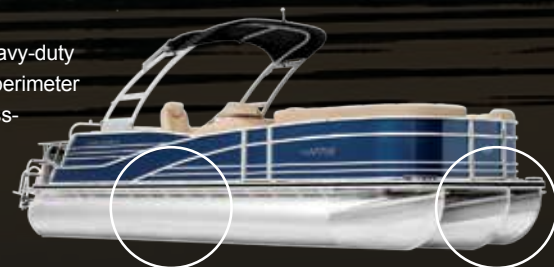

A HIGHER STANDARD

For nearly 60 years, we've created first-class, luxurious pontoons. And while we take pride in our work, we refuse to give in to complacency. By crafting new models with upgraded technology, more plush amenities and greater horsepower, we're working hard to build a better boat for you. Feel the difference for yourself.

Aluminum Rubrail

The patented 3" deep heavy-duty rub rail along the deck's perimeter is supported by thick cross-members rather than the wooden deck for added impact resistance.

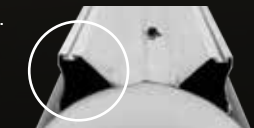

Solid Two-Piece Dolphin Nose Cone

Invented in the Harris factory in 1959, the patented dolphin nose cone allows the pontoon to slice through water with minimal spray and unmatched precision. The two-piece construction ensures long-lasting durability and confident handling with no sharp edges or exposed welds.

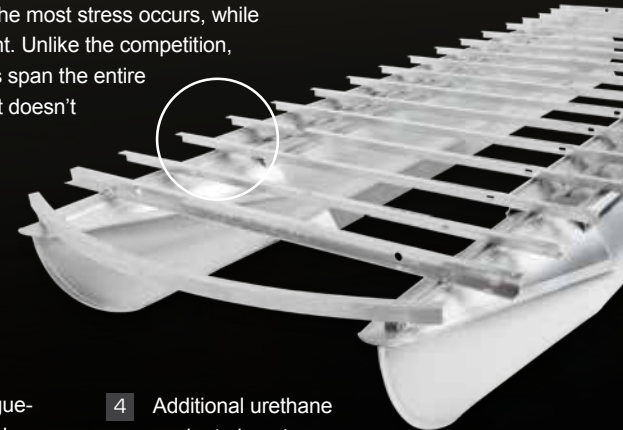

Full-Length M-Bracket System

The continuous M-Bracket transfers stress away from seams during high-performance maneuvering. In rough water and during sharp turns, the M-Bracket diminishes torque and twist, ensuring a confident and stable ride.

Innovative Cross-Member Infrastructure

Forming the foundation of the pontoon, strategic cross-member placement in a Harris pontoon adds strength where the most stress occurs, while reducing overall weight. Unlike the competition, Harris cross-members span the entire deck width, ensuring it doesn't sag over time.

Four-Step Water Prevention System

Harris achieves unequalled water-intrusion resistance—which maximizes the overall life of the pontoon flooring and decking—with these four steps:

- 1 Butyl rubber tape between cross-members and deck seals deck seams from water.
- 2 Urethane sealant between deck seams blocks water intrusion.
- 3 Interlocking tongue-and-groove* deck construction provides a solid seal that holds up over time.
- 4 Additional urethane sealant along top seams and screw caps blocks potential water penetration under flooring.

*3" deep aluminum rubrail, solid two-piece dolphin nose cone, tongue-and-groove not available on Cruiser or Omni.

Both warranties are transferable. See your dealer for complete warranty details. Standard exclusions may apply.

FEATURES AND OPTIONS

MOORING COVERS

BIMINIS AND ENCLOSURES

Getting full sun coverage never looked so good or came with so many features. Whether you choose the power folding Sport Arch or the assisted-folding Delta Arch, you can still have sun coverage for the bow occupants. Adding a double Bimini to your Harris includes a collapsible and removable bow Bimini that attaches to the standard Bimini. For even more protection from the elements, two types of enclosures are also available.

EXPRESS ENCLOSURE

WINDSHIELDS

WRAP AROUND WINDSHIELD (FULL, HIGH PROFILE WITH CLEAR GLASS)
AVAILABLE ON SOLSTICE DC ONLY

WRAP AROUND WINDSHIELD (SPORT, LOW PROFILE, BLACK FRAME WITH SMOKED GLASS) AVAILABLE ON SOLSTICE DC ONLY

Not pictured: 8' Bimini (Omni series only)
