**3 - Year
Structural
Warranty**

Adventurer Campers provide a 3-year structural warranty. Appliance warranties vary and are set by the respective manufacturer. Please contact your dealer for complete details regarding warranty policies.

NOTICE: Adventurer takes great care in providing accurate truck camper weights and measures information on its units by weighing each camper individually. Please check the wardrobe or closet for an accurate unit dry weight with factory installed options at time of manufacture.

Truck Camper Guide

Matching a Camper to a Truck

When purchasing a Truck Camper, there are a few important factors to consider

1. **The payload capacity** – sometimes this rating is posted in the glove box or door post of your truck, if not, another way to determine payload capacity would be to weigh your truck, full of fuel, people and of course the dog, and then subtract that weight from the (GVWR) posted on the door of your truck (see example to the right) and that difference would equal your payload capacity (weight of camper you can carry). Example, your truck weighs 6800lbs and the GVWR on the door reads 9900lbs your payload would be 3100lbs (9900lbs-6800lbs=3100lbs).
2. **GVWR (Gross Vehicle Weight Rating)** – is the maximum weight the manufacturer rates that truck to carry, including weight of the truck and all people. Cargo, fuel etc.
3. **GAWR (Gross Axle Weight Rating)** – is the maximum rating the manufacturer rates the axles to carry. These ratings are usually posted on the driver's side doorpost. To determine these ratings on your truck with cargo (camper) weigh your truck with just the front and then just the rear axle on the scales. This will give you your axle weights for your truck with your camper, these weight should fall within the manufacturers axle ratings.
4. **Tire capacity (rating of your tire)** – This is the tiny fine print on the sidewall of your tire, see photo to the right, usually just behind the tire inflation number. This will usually be a direct correlation to the axle ratings and GVWR on a new truck. **This will always be your weak link** in your weight carrying capacity and should always be checked before carrying any load, including a passenger car for that matter. ***Always make certain you choose tires with the proper load capacity to handle whatever load you are carrying with your vehicle!***
5. **COG (Center of Gravity)** – also known as Center of Balance is the point that the weight of your camper is balanced. ALP notes the COG on every camper with a large red arrow, this is determined as it is weighed and balanced as it goes out the door. Your camper COG should fall into the "Load Range" of your truck, see your owners manual for this measurement, note example from an owners manual on the left. As you can see in the example, to the right, the COG of this camper easily falls into the load range of this truck. As the owner, it is your responsibility not to exceed the weight or COG specifications of your truck when purchasing a truck camper. Always think safety first before loading a camper on your truck. Please consult your dealer, who can help you select aftermarket items designed to aid in proper use of your truck and camper combination.

Suspension Enhancements - Suspension enhancements allow you to manage your load but does not change or add to a trucks GVWR. In some areas you can make upgrades to your truck and then have it inspected by a DOT (Department of Transportation) and you may be able to increase your "legal" GVWR. Check with your local licensing agency regarding increasing your GVWR rating.

Torklift Stable Loads - We use and recommend this product. Today's truck manufacturers market trucks to be our everyday driver, thus they want the empty loaded truck to be as smooth a ride as possible. To accomplish this they lower the overload spring (the heavy weight bearing springs) 3" to 4" lower to give that smoother ride when empty. The problem with this is when you add any weight to the truck it appears to be sitting low in the rear or "overloaded" since the vehicle has to drop 3 to 4" before it touches the overload spring. Stable Loads by Torklift simply fill this space so that as soon as you add the load, the weight immediately sets on the overload springs allowing your trucks suspension to do what it was designed to do, carry a load, a camper in this case.

Air Bags - We use and recommend air bags also, in the correct application! Some truck manufacturers recommend airbags in all applications and suggest you inflate them 80 to 100 lbs in the bags. **We don't recommend air bags to be used in this way**, because in too many cases, this will raise your camper up off of the suspension causing you to have a spongier unsafe ride! If you choose air bags we only recommend you inflate them so that you are just touching the overload springs of your truck for the best ride and handling characteristics.

Light Weight 1/2 Ton Campers...

POUND FOR POUND the 80GS and 80RB Pack a Punch!

*Looking for the lightest weight, full-featured fiberglass exterior truck campers for your half ton full-size trucks? Well, you've found them! The 80RB and 80GS incorporate many truck camper firsts! Special composite panels and building substrates, developed and proven in the automotive and structural housing markets, shed weight while adding incredible strength and impact resistance. **Adventurer's Exclusive TCC Construction** (True-Composite Construction) meticulously bonds these materials together, along with full closed cell block foam insulation and Lamilux 4000 exterior gel-coat fiberglass to create solid and lightweight structural components backed by our **industry-leading 3-Year Structural Warranty**. **Adventurer meets the challenge** of creating a self-contained truck camper with interior shower, hot water tank, furnace, fresh-water foot flush toilet with fresh, grey and black holding tanks, large refrigerator/freezer, and ample storage and built 4-season ready with tanks, water lines all enclosed inside of the unit for year around camping!*

80RB 1779 Lbs fits 1/2 ton & larger trucks, Including the Nissan Titan and the Toyota Tacoma (right). Also fits LB and larger trucks (below).

The 80RB is another industry first... This 8' truck camper features a North/South 60x80 queen bed, full bath, shower, sofa and fits all SB & LB trucks including the 5.5' Super SB!

80RB on a 5.5' SB Toyota Tundra

80RB on LB F-350

80GS 1625 Lbs fits 1/2 ton & larger SB trucks... (Fits super short bed 5.5', 6', 6.5' & 6.75' SB beds, will not fit LB trucks)

The 80GS is the only 8' truck camper with a slide-out (below), full bath with shower and well within the range of most full-sized 1/2 ton SB trucks! Roomy East/West Bed for a shorter overhang.

Adventurer Dinettes,

86FB Dinette - right with 2017 Dawn Interior.

Note the large open living area the 86FB dinette provides for your camping comfort. The large dinette windows really open up this floorplan, shown here is the standard fabric window shades for your privacy.

The 86FB also comes standard with the Dream Dinette® which eliminates that annoying table leg, allowing you much more leg room in your dinette and easily makes into a bed with the flip of a lever...

86FB Dinette made into bed

86FB Dinette - 2017 Dawn interior Decor

910DB U-Shaped Dinette right - This floorplan features a large u-shaped dinette with the sliding D-Style table allowing you to adjust to use as a face to face style dinette or slide out and rotate for use as a u-shaped lounge. Note the large windows creating the nice open view of this floorplan. Note the optional power bunk above the dinette, see details of this Adventurer Exclusive option below...

Adventurer Exclusive - Electric Power Bunk®

(optional). This 26"x76" power bunk easily moves down for use with the push of a button and as you can see in the pictures below you can still use the lower rear section as a second bunk if needed, all the while leaving your dinette in the made up position! Want another adult bed, then make down the dinette for a 48"x72" additional bed and still have the use of the Power Bunk®. Sleeping for 5 Adults!

(Available on 910DB only)

Roomy, Comfortable & Elegant...

Adventurer's first ever double slide truck camper, is an industry first, and voted Truck Camper Magazine's Truck Camper of the year by their readers for a good reason. This camper is unique in design with its rear slide-out & peninsula galley, exceptionally large windows and the fact this camper is fully usable with both slides in the in (closed) position! When you see the large roomy Dream Dinette® in the second slide-out or the standard sofa that both make into additional beds to sleep up to 6, you too will agree this is definitely an industry leader! Note the optional Theater Seating in this photo truly making this your home away from home...

Construction & Special Features

Adventurer TCC Construction

TRU-COMPOSITE® CONSTRUCTION TCC® WOOD

- 1 Closed Cell Block Foam
- 2 High-Gloss Fiberglass Outer Shell
- 3 Wood Frame
- 4 Inside Wall Surface
- 5 Exterior Substrate

Wood Framed TCC® is used on non slide-out models
80GS, 80RB, 86FB, 89RB Utilize both Wood & Aluminum

TRU-COMPOSITE® CONSTRUCTION TCC® ALUMINUM

- 1 Closed Cell Block Foam
- 2 Lumber Core Insert
- 3 Aluminum Tube Frame
- 4 High-Gloss Fiberglass Outer Shell
- 5 Inside Wall Surface
- 6 Exterior Substrate

TCC® Aluminum is used on slide-out models
86SBS, 89RBS, 910DB, 116DS are all Aluminum Framed

“We’re never satisfied until Good is Better... and Better is Best”

-Erdman Epp Founder

Best Framing

2x4 & 2x2 Aircraft quality welded aluminum framing with lumber core insert for superior strength and structural integrity!

Adventurer frames and gussets around all windows, entry and baggage doors! Windows and doors securely attached to a solid structure, not just a foam wall!

Best Tie-Down Brackets... Adventurer

feels tie-downs are a critical construction area, that is why we use galvanized tie-down brackets bolted through our TCC laminated wing, through angle aluminum with large carriage bolts and body washers giving our Adventurer owners the **Best tie-down attachments in the industry!**

Best Insulation...

Adventurer exclusively uses “Closed Cell” block foam insulation which provides more R-Value per inch than standard foam board. This is the same foam used to manufacture coffee cups which also does not allow liquid penetration **giving our owners the Best Insulation!**

Best wall supports...

Adventurer exclusively uses “Custom Aluminum Extrusions” creating a solid side wall attachment point that cradles the side wall with full support and then the wall is glued with construction adhesive, clamped and lag screwed together giving our owners the **Best side wall**

“We’re never satisfied until Good is Better... and Better is Best” -Erdman Epp, Founder
