RECREATIONAL RANGE

RECREATIONAL LITE RANGE

INTRODUCING YAMAHA'S LARGEST EVER WAVERUNNER RANGE

After recently celebrating our 30th anniversary in the personal watercraft industry, Yamaha is excited to launch the most anticipated and comprehensive range of recreational and high performance Yamaha WaveRunners in our 30-year history.

Whether you are looking for a family-friendly all rounder, luxury cruiser or championship winning racer, there is now a Yamaha WaveRunner to suit every skill level, desire and budget.

The 2017 line-up sees the triumphant return of the legendary GP, relaunched as the all new, supercharged, GP1800. This super powerful, ultra-lightweight and compact muscle craft is guaranteed to be the weapon of choice for championship winning racers and thrill seekers around the world.

To round-out the 2017 offering, Yamaha has also released an all new Recreational Lite range of EX Series WaveRunners. These fun, nimble and highly responsive WaveRunners provide a very affordable option for first-time owners and experienced riders who love the excitement these compact machines offer.

In addition to these new models, Yamaha has released 2017 versions of the luxurious and powerful FX Series, the best-selling VX Recreational range and the race-inspired VXR and SuperJet watercraft. All of these craft come with new eye-catching colours and updated graphics.

Every Yamaha WaveRunner comes with a highly dependable, extremely powerful, purpose built marine engine, perfectly matched to a state-of-the-art, light-weight

hull and deck. Each watercraft comes packed with the latest features and technical innovations – with most models including Yamaha's innovative RIDE™ dual throttle control system.

Yamaha WaveRunners continue to set the benchmark when it comes to low maintenance, high resale value, reliability, fuel efficiency, power and performance.

With the 2017 line-up – catering for all riders from beginner, family riders, weekend day trippers, freestyle sports enthusiasts, racers, and serious tourers, there has never been a better time to get your hands on a Yamaha WaveRunner.

WAVERUNNER 2017 RIDE

RIDE™

Yamaha's patented RIDE™ (Reverse with Intuitive Deceleration Electronic) provides a new and innovative way to control your WaveRunner when running, turning, decelerating and reversing.

Simply pull the right trigger to control forward thrust and the independent left RIDE™ trigger to decelerate while riding or to reverse the watercraft.

This independent throttle control for forward and reverse thrust is not only convenient and intuitive, but allows the rider to maintain a secure riding position with both hands on the handlebars at all times.

Deceleration occurs by deflecting the jet thrust forward using the reverse gate. This deflected jet thrust is split into left/right directions delivering controlled deceleration while still maintaining the craft to natural running position with limited roll forward.

By deflecting jet thrust to the sides, RIDE™ allows the rider to control the direction of the watercraft even when reducing speed.

Whether launching off a trailer, docking in a tight spot or retrieving your WaveRunner after an exciting day on the water – RIDE™ makes maneuvering your personal watercraft simple and effortless.

With the jet thrust deflected to the sides of the craft, RIDE™ is able to reduce roll forward, minimize spray and help the driver maintain his natural position during deceleration.

© Yamaha Motor America, Inc.

By optimizing the shape of the reverse gate, the difference between left and right jet thrust can be adjusted via steering, thus enabling the rider to turn even when reducing speed.

Jet Thrust

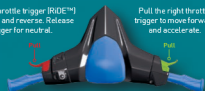

Jet Thrust

Jet Thrust

RIDE™ FUNCTIONALITY

Pull the left throttle trigger (RIDE™) to decelerate and reverse. Release the trigger for neutral.

Pull the right throttle trigger to boost forward and accelerate.

Start Engine
Craft starts in neutral.

Go Forward
Use throttle trigger.

Decelerate
Use RIDE™ trigger or release the throttle.

Go Backward
Hold RIDE™ trigger. Allows quick operation without releasing your hands from the steering.

Select Neutral
Release the RIDE™ trigger.

Stop Engine
Reverse gate returns to forward position.

POWER, PERFORMANCE, RELIABILITY.

Designed and manufactured in Japan, Yamaha WaveRunner marine engines continue to lead the industry in innovation, quality and engineering excellence.

These superb pieces of machinery are designed to deliver exceptional power-to-weight ratios, smooth and quick acceleration, high top-end speed, great fuel economy, low emissions and quiet operation.

Famous for their reliability and durability, Yamaha marine engines have been purpose-built to handle the harshest conditions. All WaveRunner engines utilize a maintenance free, open loop cooling system, proven to be the most effective and reliable cooling solution for engines operating in marine environments.

Supercharged 1.8 Litre SVHO Engine

Yamaha's four-cylinder, four-stroke, 1812cc, Super Vortec High Output (SVHO) marine engine is the most technically advanced motor ever designed for personal watercraft and the most powerful engine ever in Yamaha's WaveRunner range.

This engine produces approximately 20% more power than its predecessor and features improved cooling, a more efficient intake and stronger forged internals.

The large race inspired, 8 vane 140mm Hyper-Flow jet pump helps turn this supercharged power into electrifying acceleration, delivering greater thrust and instantaneous water displacement.

The Electronic Fuel Injection (EFI) delivers smooth and efficient power output, for a reliable and consistent riding performance.

This engine is available in the following WaveRunner models: GP180, FX Cruiser SHVD and FX SHVD.

High Output 1.8 Litre Marine Engine

This four-cylinder, 1812cc, High Output engine delivers the largest marine engine displacement of any personal watercraft in its class.

Yamaha's big, naturally aspirated engine delivers effortless power, resulting in thrilling acceleration and excellent top-end speed while also delivering outstanding fuel economy, low noise and reliability that is second to none.

This engine comes with a 155mm high pressure pump for maximum thrust and acceleration.

This engine is available in the following WaveRunner models: WR, FX Cruiser HD and FX HD.

Supercharged 1.8 litre SVHO marine engine.

TR-1 High Output Marine Engine

This three-cylinder, four-stroke, 1586cc, high-output marine engine is significantly smaller, lighter and delivers more horsepower than the previous four-cylinder MR-1 engine that it replaced.

Weighing only 72kg with an improved exhaust system and 15% more output than the base TR-1 Marine Engine, this pocket rocket delivers awesome power to Yamaha's VX recreational range of watercraft.

Its outstanding acceleration is made possible by a combination of the high-flow intake, the 155mm Hyper-Flow high-pressure jet pump and the stainless steel impeller.

This engine is available in the following WaveRunner models: VX Limited, VX Deluxe and VX.

TR-1 marine engine.

TR-1 Marine Engine

The TR-1 Marine Engine has similar specifications to the TR-1 High Output Marine Engine, but with a slightly modified exhaust system for a more compact design.

The TR-1 engine powers the all new, lightweight, EX Series of WaveRunners. This powerful unit has been perfectly matched to a 140mm swirl-flow high-pressure pump, creating an exciting and highly responsive hull and engine combination.

The TR-1 engine delivers a unique performance for a fun and exhilarating experience for solo riders, while also providing enough grunt to power the whole family.

The exceptional fuel economy of the TR-1 engine allows riders to enjoy their time on the water from sunup to sunset, and as with all of Yamaha's WaveRunner engines, reliability comes standard.

This engine is available in the following WaveRunner models: EX Deluxe and EX.

701cc Marine Engine

The legendary Yamaha SuperJet is powered by the high-performance, two-cylinder, two-stroke 701cc Yamaha Marine Engine. Two 38mm Mikuni carburetors lend this world-class power plant, for excellent throttle response throughout the RPM range.

The SuperJet 140mm Hyper-Flow jet pump propulsion system is designed to maximise water flow for high performance, delivering excellent hook-up and smooth acceleration.

The stainless steel impeller was developed using fluid analysis technology and feedback from racers, delivering superior acceleration and top-end speed.

This engine is available in the following WaveRunner model: SuperJet.

LIGHTWEIGHT, STRONG, RESPONSIVE.

Yamaha's cutting-edge decks and hulls have played a critical role in the overall success of the Yamaha WaveRunner range.

Yamaha's high compression molding techniques allow extremely accurate production for high quality fit and finish, while investment in material innovation has continued to set new industry benchmarks in hull design and construction.

Produced in our state-of-the-art manufacturing facilities in the USA, every deck and hull has been designed to produce an exceptional on water experience.

Innovation through Technology

Yamaha's innovative high pressure molding and cutting-edge material technologies result in ultra-lightweight and extremely strong hulls and decks.

NanoCel2 cellular technology.

EX WaveRunner with SMC Compound hull and deck.

VX Limited WaveRunner with NanoCel hull and deck.

SMC Hull and Deck Material

Yamaha's Sheet Moulded Compound (SMC) marine-grade fiberglass hulls and decks deliver great strength, durability and piece-of-mind.

This high strength reinforced composite material can withstand extended periods of exposure to heat and corrosive conditions, so is ideally suited to harsh marine environments.

SMC compound is used in the following WaveRunner models: VX, EX, EX Deluxe and SuperJet.

NanoCel1 Lightweight Hull and Deck Material

Yamaha's NanoCel1 lightweight, high-strength material was a ground-breaking innovation that redefined WaveRunner performance. NanoCel1 reduces the weight of the hull, deck and liner by 29%, achieving improved power-to-weight ratios and delivering performance gains in acceleration, fuel efficiency, top-end speed and handling.

NanoCel1 was developed by Yamaha by utilising a nano engineered clay, creating a denser, stronger material that utilises more efficient use of space and stronger bonds at a molecular level.

With its shiny, gem-like surface finish, NanoCel1 hulls create reduced surface tension on the water, improving overall acceleration and performance.

NanoCel1 is used in the following WaveRunner models:

VX Deluxe, VX Limited, VXR, FX HD and FX Cruiser HD.

NanoCel2 Ultra-lightweight Hull and Deck Material

Yamaha has taken its nanotechnology to the next level with the development of its NanoCel2 Ultra-lightweight, sports performance, hulls and decks.

NanoCel2 utilises nano engineered exfoliated clay material bonded with a newly formulated resin containing glass microbubbles. These glass microbubbles maximise strength while minimising weight.

The result is a material that is almost 40% lighter than traditional SMC hull material, but with all the strength of NanoCel1. This advanced material compound delivers exceptional performance properties, resulting in improved acceleration, higher top-end speed, greater fuel economy, and a more nimble and responsive ride.

NanoCel2 is used in the following WaveRunner models:

DP1800, FX SVHO and FX Cruiser SVHO.

FX SVHO Performance WaveRunner High-Speed

RACE INSPIRED 2017 RANGE

RACE INSPIRED

RACE INSPIRED

NEW GP1800 THE CHAMP IS BACK - BIGGER, BETTER, FASTER.

After many years out of the Yamaha line-up, the legendary GP makes a triumphant return in the form of the all new, super-powerful, race ready GP1800.

Living up to its predecessor's championship winning reputation, the 2017 GP1800 combines incredible power with a compact body, resulting in exhilarating acceleration, superb handling and race winning performance.

This adrenaline packed craft is powered by Yamaha's ultra-high performance Super Vortex High Output (SVHO) large displacement marine engine, which has dominated the race scene overseas since its introduction. This 1.8 Litre, four-cylinder, supercharged power

plant, with the addition of a 160mm high pressure hyper-flow pump, delivers massive power and awesome acceleration.

Complementing this incredible power source is Yamaha's technically advanced, ultra-lightweight and extremely strong, NanoKee2 hull and deck. This innovative material delivers a total dry weight of just 318kg - that's a 37 kilogram weight advantage over the GP1800's nearest muscle craft rival.

This hull design, based around the Yamaha VXR, is one of the best handling hulls ever produced. With modified hulls a strakes, softer bow chines, and a performance driven keel shape, the GP1800 handles tight turns like it's running on rails.

Control and handling is intuitive, with Yamaha's innovative RIDE™ dual throttle handbar controls and electric trim technology. The ability to quickly and easily fine tune the trim attitude of the GP1800 on the fly allows the rider to unleash maximum performance in all conditions.

Designed to leave the competition in its wake, the GP1800 muscle craft delivers the ultimate championship winning package for professional racers, performance enthusiasts and weekend warriors.

Torch Red Metallic

GP1800 FEATURES

① Multifunction Instrumentation Centre relays speed, RPM, fuel level with low fuel warning, low oil pressure warning, hour meter and check engine light with self-diagnostic function.

② Race-ready performance styling includes sport-lookstered seat and aggressive graphics.

③ The NanoKee2 Hull and deck is extremely strong, lightweight and highly responsive - designed to deliver maximum handling performance in both racing and recreational riding environments.

④ The electronic shift system allows the rider to quickly adjust how high or low the bow sits in the water, improving the craft's overall handling and on-water performance.

⑤ The 1.812cc Super Vortex High Output engine with 160mm jet pump delivers more power and torque than any WaveRunner in the Yamaha range.

⑥ RIDE™ is the world's first dual throttle handbar control system, that makes handling intuitive. Pull the right lever to accelerate and the left lever to decelerate and for reverse.

VXR RACE BRED POWER AND PERFORMANCE.

With its championship winning credentials, the VXR continues to be the naturally aspirated craft of choice for performance enthusiasts and thrill seekers throughout the world.

Combining an extremely powerful, naturally aspirated, 1.812cc High Output marine engine, with Yamaha's innovative NanoSteel hull, this muscle craft delivers an awesome blend of performance, real world versatility and fuel efficiency.

The sleek, ultra-lightweight and race-ready hull utilising Yamaha's exclusive NanoSteel material is up to 25% lighter than

traditional hull construction, delivering razor-sharp handling and exceptional control.

With class leading acceleration of 0-50kph in 1.8 seconds, impressive top-end speeds and race winning performance, the VXR provides a very affordable and versatile option for those wanting a race ready, high performance machine.

To maximise its performance capabilities, the VXR comes with Yamaha's patented RIDE™ and electric trim technologies. Electric trim allows the bow to be quickly raised or lowered for improved

ride and handling in variable conditions, while the RIDE™ dual throttle control system, delivers simple and intuitive control of forward and reverse thrust, resulting in increased control and directional responsiveness.

With its race inspired two-piece seat, digital instrumentation, lock-away reboarding step, low hook, chrome accented components and aggressive styling - the VXR continues to be the number one choice for enthusiasts and racers who crave class-leading acceleration and lightweight agility in an affordable package.

Carbon Metallic with Lava

VXR FEATURES

❑ The 1.812cc high output engine provides exhilarating acceleration. Superior economy is achieved through state of the art combustion efficiency.

❑ RIDE™ is the world's first dual throttle handoperated control system, that makes handling intuitive. Pull the right lever to accelerate and the left lever to decelerate and/or reverse.

❑ Yamaha's lightweight hulls and decks are engineered at a molecular level using nanotechnology, a process that builds up thousands of layers of NanoSteel material.

❑ Vital engine operation information is relayed directly to the rider via the digital information centre.

❑ The VXR reboarding step is ergonomically designed to make it easier to reboard after a swim and conveniently tucks away when not in use.

❑ A five position electronic trim switch allows for precise and quick trim adjustment, all at the push of a button.

SUPERJET THE ULTIMATE STAND UP PERFORMER.

When it comes to race proven performance, there is no other stand-up watercraft that can match the reputation of Yamaha's legendary SuperJet.

As the number one best-selling stand-up watercraft of all time, the SuperJet continues to be the machine of choice when it comes to championship closed course racing and freestyle riding around the world.

But don't let the SuperJet's extreme credentials intimidate you. There's nothing more fun than a weekend playing on a SuperJet.

Tanya Lemon, 2016 ISBA World Champion, SuperJet rider and Yamaha ambassador.

Powered by a high-performance, 70 lcc, two-cylinder, two-stroke race-bred engine, the SuperJet produces exceptional power and acceleration.

This impressive power plant is combined with a sleek, race inspired hull which has been designed in consultation with world champion racers. This awesome package delivers razor-sharp handling and performance that leaves the competition in its wake.

The rider and craft must operate together in perfect harmony to truly master this style of riding. This connection is the reason many riders form a lifelong love affair with their SuperJet.

The SuperJet's physically active style of riding builds fitness and strength, and makes a day of riding all the more rewarding.

For pure water sport excitement nothing matches the Yamaha SuperJet.

Pure White with Orange and Blue

SUPERJET FEATURES

① A proven SuperJet innovation, the spring-assisted handle pole moves up or down with the rider, providing a high degree of control.

② Comfortable, slip-resistant mats inside the foot tray make it simple for the rider to maintain firm footing while changing positions during tight manoeuvres.

③ Wide, race-inspired hull, with integrated sponsons built into the hull. SuperJet grips the water with an excellent hook-up, whilst delivering unmatched stability for razor-sharp cornering.

④ The heart of the SuperJet is the proven 70 lcc, two-stroke, two-cylinder engine. Featuring remarkable durability, flexibility and a high level of race-bred performance.

The ultimate combination of performance, control and freedom. The best-selling stand-up watercraft of all time is everything a beginner or expert rider could ask for.

LUXURY PERFORMANCE 2017 RANGE

LUXURY PERFORMANCE

LUXURY PERFORMANCE

FX CRUISER SVHO ULTIMATE LUXURY, ULTIMATE PERFORMANCE.

The FX Cruiser SVHO is the premier model in Yamaha's WaveRunner range, delivering the ultimate combination of unbridled power, high-end luxury and cruising comfort.

Whether effortlessly cruising over long-distances or carving it up at high speeds, the FX Cruiser SVHO delivers in every situation.

Powered by Yamaha's 1812cc Super Vortex High Output marine engine, this craft produces more supercharged power, torque and displacement than any other Yamaha WaveRunner in history.

Matched to the ultra-lightweight and highly responsive NanoCoil² hull and deck, the FX Cruiser SVHO delivers exceptional stability and handling for its size.

Not to be outdone, the FX Cruiser SVHO comes packed with cutting-edge technologies and luxury extras. Innovations include Yamaha's patented RIDE™ - dual throttle hand/cable control system, Cruise Assist, No Wake mode, electric trim, remote security and Advanced Multifunction Information Centre which includes a digital compass, water and air temperature and fuel flow gauges.

Other high-end features include a two-tone three-person Cruiser Seat, pull-up cleats, 181 adjustable steering, double grab handles and deep re-boarding step, extended stern platform and a massive 125.5 Litres of storage space.

Engineered for riding excellence, the FX Cruiser SVHO is the pinnacle of all-round power, style and luxury riding experience.

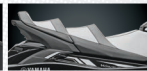

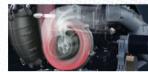

Black Metallic

FX CRUISER SVHO FEATURES

1 The 1812cc Super Vortex High Output engine with 181mm jet pump delivers more power and torque than any WaveRunner in the Yamaha range.

2 Yamaha's ultra lightweight NanoCoil² hulls and decks are engineered on a molecular level using nanotechnology, making them extremely rigid and strong.

3 By setting a consistent engine speed, Cruise Assist reduces throttle fatigue - making long hours more comfortable, while the No Wake Mode caps the engine's RPMs at an easy idle speed.

4 RIDE™ with electronic trim is the world's first dual throttle hand/cable control system. Pull the right lever to go forward, and the left lever for reverse. Pull them both, or in any combination, and the system reacts with precise control. Benefits include better handling and smooth deceleration.

5 The spacious, precision-stitched three-person, theatre-style Cruiser seat keeps everyone on board more comfortable for all day cruising.

6 Multifunction instrumentation relays speed, RPM, fuel level with low fuel warning, low oil pressure warning, hour metre and check engine light with self-diagnostic function.

FX SVHO RAW REFINEMENT.

If supercharged power, exceptional handling and a tonne of extra features gets you excited, then Yamaha's high-end FX SVHO WaveRunner is your craft of choice.

This powerful yet surprisingly agile watercraft offers outstanding all-round versatility, whether racing, touring, three-up riding or towing. The key to its success is the partnering of Yamaha's highly powerful, 1812cc, Super Vortex High Output (SVHO) marine engine with the

cutting-edge, ultra-lightweight NanoCel2 hull and deck. This combination of industry leading technologies delivers unbelievable power and exceptional handling performance.

The innovations don't stop there! This technology packed craft comes with Yamaha's patented RIDE™ - dual throttle handbar control system, tilt adjustable steering, Cruise Assist, No Wake mode, electric trim, remote security and Advanced Multifunction Information Centre.

For added luxury, comfort and convenience, the FX SVHO includes a three-person two-piece seat, double grab handles and padded boarding step, extended rear platform and a large 125.5 Litre storage capacity.

With all these features, massive power output and awesome handling performance, the FX SVHO delivers the ultimate all-round-on-water experience.

FX CRUISER HO UNBEATABLE COMFORT, EFFICIENCY AND PERFORMANCE.

The luxuriously appointed FX Cruiser HO brings a new level of style, comfort and performance to the personal watercraft market. Designed with luxury touring in mind, this craft is built on a highly stable and responsive NanoCel platform, perfectly complemented with the powerful and fuel efficient, 1.8 litre, naturally aspirated, four-cylinder, High Output marine engine.

Offering incredible versatility, the FX Cruiser HO is equally capable for a huge range of applications from long day trips exploring new waterways to water sports with the family. The FX Cruiser HO delivers all this versatility along with plenty of big engine power, guaranteed to get the heart racing as soon as you pull the trigger. This perfect balance of comfort, power and performance means the FX Cruiser HO is a craft for all seasons and all riders.

Finished all with a theatre style three-person Cruiser Seat, pull-up cleats, Yamaha's intuitive RIDE™ dual throttle control system, electric trim, adjustable tilt steering, extended padded rear platform, large storage space and many other features, the FX Cruiser HO raises the bar in luxury cruising, power and on-water performance.

VX LIMITED PRESTIGE PERFORMANCE AND FEATURES – REIMAGINED.

With its great ride performance, feature packed extras and stylish finish, the VX Limited is the premium all-rounder of the ever popular VX Recreational WaveRunner range.

This craft is built for fun and comfort, integrating Yamaha's powerful TR-1 High Output marine engine and lightweight Nanocel hull and deck, with Yamaha's exclusive Cruiser Seating platform.

The VX Limited comes standard with Yamaha's patented RIDE™ dual throttle handbar system. This innovative technology gives the rider intuitive control over forward and reverse thrust, resulting in improved manoeuvrability and handling performance.

The VX Limited also features Yamaha's Cruise Assist control, making it easy to set and hold a comfortable cruising speed when travelling long distances, or dial in the perfect towing speed for water sports. The VX Limited's no wake mode makes travelling through on-tended no-wash zones and restricted speed zones a breeze by setting and holding the perfect speed to minimize wash.

Other exclusive features include the built-in quick release tow hook, which makes towing set-up more convenient, and dual pull-up cleats, which make securing the craft to docks or other vessels easier.

The VX Limited delivers the pinnacle of comfort and high quality finish in a package that's pleasingly affordable. The stunning metallic paint and prestige graphics highlight the powerful lines and aggressive profile of the VX deck, delivering a package that's sure to turn heads on the water.

When it comes to on-water fun, affordable luxury and adventure, the 2017 VX Limited delivers on all accounts.

③ By setting a constant engine speed, Cruise Assist reduces throttle fatigue – making long hours a more comfortable, while No Wake Mode caps the engine's RPMs at an easy idle speed.

④ RIDE™ is the world's first dual throttle handbar control system. Pull the right lever to go forward, and the left lever for reverse. Pull them both, or in any combination, and the system reacts with precise control. Benefits include better handling and smooth deceleration.

⑤ Yamaha's innovative cruiser seat concept delivers additional comfort and a secure riding position for both rider and passengers.

⑥ Deep fold away reboarding step, large swim platform and the convenience of a tow-hook for wakeboarding, water skiing and other tow sports.

VX DELUXE GREAT LOOKS, GREAT FEATURES, GREAT RIDE.

Combining ride performance, sporty looks and cool features as standard, the 2017 VX Deluxe is the perfect platform for riders who value style and substance.

Powered by Yamaha's TR-1 High Output, 104frc, three-cylinder engine - this craft achieves excellent acceleration and speed from its lightweight, purpose-built marine engine. When combined with

its performance driven keel and innovative NanoCel hull and deck, the VX Deluxe delivers a highly fuel efficient, exciting and agile riding experience.

Included in the VX Deluxe package is Yamaha's innovative RIDE™ and Cruise Assist technologies. RIDE™ provides a unique dual throttle system that delivers simple and intuitive control over forward

and reverse thrust, while Cruise Assist allows the rider to set and maintain an ideal speed, making cruising and towing easier.

With its sporty colours and graphics, ultra-comfortable three-person two-tone seating, extended re-mount platform, towing hook and rebounding step, the VX Deluxe provides an affordable, highly capable and enjoyable on-water experience.

Black Metallic with Lava

VX DELUXE FEATURES

① The Yamaha TR-1 High Output engine delivers increased power while also significantly reducing overall weight. The exceptional power-to-weight ratio delivers an exciting ride and outstanding fuel economy.

② Yamaha's lightweight hulls and decks are engineered at a molecular level using nanotechnology, a process that builds up thousands of layers of NanoCel material.

③ By setting a constant engine speed, Cruise Assist reduces throttle fatigue - making long hours a more comfortable, while No Wake Mode caps the engine's RPMs at an easy idle speed.

④ RIDE™ is the world's first dual throttle handlebar control system. Pull the right lever to go forward, and the left lever for reverse. Pull them both, or in any combination, and the system reacts with precise control. Benefits include better handling and smooth deceleration.

⑤ 13.2 litres of total storage, ample room for drinks, food, spare clothing, and towels etc, along with other marine sports gear helping you to enjoy your marina life experience.

⑥ Deep fold away rebounding step, large swim platform and the convenience of a tow-hook for wakeboarding, water skiing and other tow sports.

**FEATURES**

RIDE™ Throttle with Traction Control

RECREATIONAL LITE 2017 RANGE

RECREATIONAL LITE

RECREATIONAL LITE

NEW EX DELUXE WELCOME TO GENERATION EX.

In 2017 Yamaha launches the all new EX series of watercraft. These exciting new WaveRunners offer riders a more traditional sized watercraft, reminiscent of the many fun and agile models produced over Yamaha's 30-year watercraft heritage. And best of all - the new EX models are packed full of Yamaha quality, reliability and four-stroke technology to deliver the most fun and enjoyment money can buy.

By utilising an all new performance hull, matched with Yamaha's lightweight TR-1 engine, the EX Deluxe is able to deliver nimble performance and handling that brings a smile to the face of all who step on board.

The ride is highly responsive but easily controlled. The rider can seamlessly switch from relaxed cruising to high intensity riding and manoeuvres in the blink of an eye. It's for this reason the EX Deluxe will be so popular for a huge group of riders, from families to extreme watercraft enthusiasts, both beginners and experienced riders alike.

The all new EX Deluxe combines affordability with technical innovation with more features than you would ever imagine on a craft of this size. This includes Yamaha's exclusive RIDE™ control system.

giving the rider simple and intuitive control over forward and reverse thrust.

Other features include a family-friendly three-person seat, reboarding step, non-slip Hydro-Turf Mats, dual mirrors, built-in low hook, multi-function LCD instrumentation display and lots of handy storage space.

With its many features, exciting on-water performance and value for money price, the EX Deluxe stands in a class of its own.

Azura Blue Metallic

EX DELUXE FEATURES

ⓐ This 106fsc TR-1 engine delivers an exceptional power-to-weight ratio for quick acceleration, higher top-end speeds, outstanding fuel economy and a more exciting ride.

ⓑ Yamaha's Sheet Moulded Compound (SMC) marine-grade foregrips, hulls and decks deliver great strength, durability and peace-of-mind.

ⓒ RIDE™ is the world's first dual throttle handlebar control system, that makes handling intuitive. Pull the right lever to accelerate and the left lever to decelerate and/or reverse.

ⓓ The reboarding handle and fold-away reboarding step makes coming back on the craft safe and easy.

ⓔ With a 30 litre, class leading storage capacity, there is more than enough space in the bow, glovebox and under the seat, for stowing personal belongings and equipment.

ⓕ The strong built-in low hook enables the EX Deluxe to securely tow an inflatable tube, wake board or skier for additional thrills and spills.

NEW EX FUN HAS NEVER BEEN SO AFFORDABLE.

Yamaha is excited to launch the all new Yamaha EX - an exciting addition to Yamaha's 2017 line-up of high performance WaveRunners - delivering maximum fun for minimal outlay.

With its lightweight and nimble hull design, and high performing Yamaha TR-1 engine, the Yamaha EX punches well above its weight, when it comes to excitement, performance and price.

This craft has been designed to deliver unmatched agility and exceptional fun on the water, while still maintaining the stability,

versatility and full three-seat configuration that makes Yamaha WaveRunners ideal for families and three-up riding.

While the Yamaha EX is an affordable option for first-time buyers, it is also suitable for more experienced riders who crave the excitement, direct control and the feeling of being one with the machine that this highly agile craft delivers.

The most affordable model in Yamaha's WaveRunner range comes excitement ready, with many class leading features that

come as standard including a built-in tow hook, convenient rebounding handle, non-slip floor mats, multi-function LCD instrument display, modern colours and graphics, extensive storage and more.

With the release of the new Yamaha EX, there has never been an easier and more affordable way to own a high performance Yamaha WaveRunner.

Pure White with Green

EX FEATURES

ⓐ This 150hp TR-1 engine delivers an exceptional power-to-weight ratio for quick acceleration, higher top-end speeds, outstanding fuel economy and a more exciting ride.

ⓑ Yamaha's Sheet Moulded Compound (SMC) marine-grade fiberglass hulls and decks deliver great strength, durability and peace-of-mind.

ⓒ With a 30 litre, class leading storage capacity, there is more than enough space in the bow, glovebox and under the seat, for stowing personal belongings and equipment.

ⓓ The EX is equipped with a strong built-in tow hook enables the craft to securely tow an inflatable tube, wake boarder or skier for additional thrills and spills.

ⓔ The Multifunction LCD Instrumentation Display provides Speedometer, Tachometer, Fuel Level and Hour Run information in a clear and easy to read layout.

ⓕ The ergonomically designed seat has been designed to securely and comfortably seat up to three passengers, while also delivering a sporty feel for aggressive one-up riding.

YAMAHA MOTOR FINANCE MAKE YOUR DREAM A REALITY

Yamaha Motor Finance Pty. Ltd. (YMF) is a 100% owned subsidiary of Yamaha Motor Australia Pty. Ltd. that has been established to give Yamaha customers access to specially tailored finance packages on Yamaha's huge range of motor products.

This unique relationship means YMF has a better understanding of marine products and more importantly caters for your needs. If you are looking to finance your new WaveRunner, YMF provides real value.

Apart from competitive repayments on loans, you also benefit from the following:

- Lock in your repayments from 2 years up to 5 years
- No hidden charges or monthly account keeping fees
- The ability to add insurance and accessories into the one loan
- A time saving application process

A YMF loan is simple and convenient. Applications can be completed in person at one of Yamaha's nationwide dealerships or pre-approved online through the Yamaha website.

YMF's goal is to help you purchase the products you have always wanted and get you on the water sooner.

For further information on finance packages contact your local Yamaha dealer, or call YMF Direct Sales on 0800 777 123 or visit www.yamaha-motor.co.nz/finance/ymf/

2017

YAMAHA MARINE INSURANCE

Yamaha Marine Insurance (YMI) is a factory backed product that offers a variety of unique policy features and benefits exclusive to Yamaha owners.

We recognise that your Yamaha WaveRunner is a treasured asset and at YMI we aim to provide you and your family with quality insurance protection so you can relax and enjoy your time on the water.

YMI is the ultimate in personal watercraft protection offering competitive rates along with a hassle free claims process.

YMI Benefits and Features

- ! Replacement of Personal Watercraft in first three years of registration.
- ! Only Genuine Yamaha parts used on repairs.
- ! No theft excess when protected with Yamaha DNA theft deterrent.
- ! New for old on mechanical and electrical components of motor on authorised claim repairs regardless of age.
- ! Premium discounts for age, boating experience and boating courses.
- ! Premium discounts for lay-up, the months you don't use your WaveRunner.
- ! 24/7 emergency claims service.

For further information contact YMI today on 0800 564 678 or visit www.ymi.co.nz

Gloves, Boots and Accessories.
Full range available online at Y-Shop.

Tailored WaveRunner Covers
Available for all WaveRunner models.

Ride Shorts

Features 2-in-1 removable neoprene undershort beneath a 4-way stretch boardshort. Also available as boardshort only.

THE INDUSTRY'S FIRST 3 YEAR MANUFACTURER WARRANTY

At Yamaha, we stand behind our product that is why we offered the industry's first 3 year manufacturer's warranty. This applies to all new WaveRunner's purchased from authorized Yamaha dealers in New Zealand and Yamaha's 3 year manufacturer's warranty covers all WaveRunner's in the Yamaha range at no additional cost to the customer. Enjoy your time on the water and the peace of mind that comes with Yamaha's 3 year factory warranty.

*3 year manufacturer warranty applies to products only. For more information on comprehensive warranty, please contact your local Yamaha dealer.

**RESPECT LOCAL MARITIME REGULATIONS**

- Always obey local navigation regulations
- Ensure your PWC is registered, with appropriate labelling affixed
- When required by local authorities, present all papers (permit, registration card, insurance document etc.)
- Observe and obey local age restrictions for riding
- Do not enter any prohibited zones
- Ride at reduced speed in harbours and obey speed limits
- Do not ride PWC at night
- Do not ride PWC after consuming alcohol or drugs

**RESPECTING THE ENVIRONMENT**

- Always refuel on land and keep engine compartment clean at all times
- Responsibly flush and clean the PWC after each ride
- Do not litter or pollute the waterways
- Respect fauna and flora, and adapt speed when in areas with a high wildlife population

**SHARING WATERWAYS**

- At all times, maintain a safe distance from the shore, other vessels, and people in and around the water
- Limit noise pollution around other vessels and residences

**RIDING RESPONSIBLY**

- Pay attention when riding and keep an eye on the conditions
- Be wary of off-shore winds and tidal currents
- Plan your trip carefully, ensure there is enough fuel and the PWC is sea-worthy before riding
- Check operational controls prior to riding
- Remain with the PWC during an emergency or mechanical failure.

**RESPECTING THE FACILITIES AVAILABLE IN PORTS**

- Do not damage launching ramps or their surroundings
- Only leave your PWC trailer in the designated parking area
- Respect other ramp users and wait in turn to launch PWC

**RIDING WITH ALL SAFETY EQUIPMENT**

- Ensure appropriate riding gear is worn at all times, ie. approved life jacket, and riding gear
- Bring a towing device (anchoring point and tow rope)
- Ensure the tether lanyard clip is attached to the driver's wrist at all times, this cuts the engine ignition if the driver falls overboard
- Bring a portable phone (in a waterproof case) or a hand-held marine radio at all times
