THE PERFECT FIT

The Fleetwood classic just got a makeover. Not just redesigned, the 2019 Flair features top-to-bottom changes to make first-time Class A owners feel like long-time professionals. With your choice of five modern floorplans, this Class A Gas is spacious, comfortable and ready for the open road with a 600-lb. capacity Hide-A-Loft™ drop down queen bed, soft-touch ceilings, a heated wet-bay, and a low profile, modern front cap. But, that’s just the beginning. The 2019 Flair also brings a host of practical features, such as 50-amp service, a 15K-BTU ducted A/C, enclosed and heated holding tanks, and pass-thru storage.
YOU WANT EVERY SINGLE ADVANTAGE WHEN IT COMES TO YOUR RV.

At REV, we don’t settle for anything less than the best, and neither should you. That’s why every Fleetwood RV motorhome features industry-leading materials and construction. With these REV brands, you’ll also find the ultimate in RV convenience and strength, like our auto hydraulic leveling system, Vacu-Bond™ construction, Dryseal™ edge coating, and much more—all coming standard to elevate your travels.

Fleetwood RV delivers superior reliability, durability, and most of all, customer satisfaction.

Each of these advantages have been engineered to deliver superior reliability, durability, and most of all, customer satisfaction.

1. Power Platform™ (also available)
   Provides designers the ability to change, delete, insert, control, and center the Platform Place Fronts a significant advancement in the design of RVs.

2. Auto Hydraulic Leveling System
   Most RVs rely on a traditional “stick and nail” construction. By adding our hydraulic leveling system, you can elevate your travels by adjusting a simple hydraulic system.

3. Framework System (Vacu-Bond® Wall, Floor, and Roof Structures)
   Our wall and roof frames are designed and engineered to fit precisely with Precision-Welded Aluminum Walls, Floor, and Roof Structures—integrating walls, floors, and roofs into one locked-together overall structure for long-term performance and durability.

4. PowerFrame System
   Fleetwood REV utilizes aluminum extrusions and steel-reinforced bridge structures to provide the base for the REV’s interlocking wall system. Made specifically for REV, the PowerFrame System provides a strong, durable foundation for the wall structure.

5. Vacu-Bond® Construction
   Our Vacu-Bond™ walls feature an interlocking bonding process that applies up to 415,000 pounds of vacuum pressure to our already strong welded-aluminum sidewall frames, bead-foam insulation, and Tuff-Coat fiberglass skin. This process creates the ultimate in RV convenience and strength, like our auto hydraulic leveling system, Vacu-Bond™ construction, Dryseal™ edge coating, and much more—all coming standard to elevate your travels.

6. Seamless Metallic Slide Room Underbelly
   What’s underneath is just as important as what’s on top. Our metallic slide bottom adds yet another level of durability.

7. Dryseal™ Edge Coating
   The exterior metal siding is applied to every edge of the sidewalls and roofs to ensure durability in all weather conditions, providing added protection from sun damage and moisture penetration. Dryseal™ is clear and easy to apply, offering a simple means of keeping up to date with the industry standards.

8. Taft-Coat Fiberglass Walls
   REV RVs use the highest quality acrylic fiberglass on our Class A and Class C products. Durable and easy to maintain, our Class A acrylic fiberglass skin is extremely strong and provides excellent insulation. The entire exterior skin has no compromise on quality or standards.

9. Tuff-Ply Engineered Vinyl Roofing
   Our slideouts include a tapered roofline that directs water away from the unit, providing an additional level of moisture protection. There are also multiple bead-foam channels in the roof which go above the standard wood bottom for protection against the elements, and will provide you with years of trouble-free operation.

10. Tuff-PEX™ Plumbing System
    Manufactured in a state-of-the-art facility located right on the REV manufacturing campus. The results are easy to see….Better protection, better performance and clear coat protected in a state-of-the-art facility located right on the REV manufacturing campus. Our REV RV family of Class A motorhomes are painted with a premium paint that is made specifically for our exterior. Our REV RV family of Class A motorhomes are painted with a premium paint that is made specifically for our exterior. Our REV RV family of Class A motorhomes are painted with a premium paint that is made specifically for our exterior.

11. Taped Sidewall Bow Steps
    Our slideouts include a bowed design which directs water away from the RV to provide an additional level of moisture protection. There are also multiple bead-foam channels in the roof which go above the standard wood bottom for protection against the elements, and will provide you with years of trouble-free operation.

12. Stainless Metallic Slide Room Underbelly
    What’s underneath is just as important as what’s on top. Our metallic slide bottom adds yet another level of durability.

13. Roto-Cast Molded Luggage Bays
    REV RV’s bonded laminates eliminate the standard metal box construction. The interior of our bonded composite box is made of three bonded layers: moisture-resistant plywood, and Tuff-Coat fiberglass skin. This process creates the ultimate in RV convenience and strength, like our auto hydraulic leveling system, Vacu-Bond™ construction, Dryseal™ edge coating, and much more—all coming standard to elevate your travels.

14. Dedicated Full-Length Metallic A/C Ducting
    Instead of cut-out foam channels, REV provides insulated A/C ducting that runs the entire length of your motorhome with carefully placed outlets in the most occupied places to assure cool comfort.

15. Pinewood ramps that absorb moisture, crack and rot are the industry standard. Instead of the industry-standard plywood, these molded bays are more durable, look great, and can be washed with a hose.

16. Automotive Inspired Bonded Windshield
    A REV RV exclusive, our Hide-A-Loft™ Overhead Bed System offers a capacity of up to 600 lbs and includes a queen mattress which is incredibly comfortable and easy to operate.

17. Pass-Through Storage
    We far exceed the industry standards of exposed seals and hinges with a more secure, latches more securely, and seals tighter.

18. Premium Paint
    Just like the cars, trucks, motorcycles and even any other automotive product, we use a higher-end solution that fits your motorhome's body better, latches more securely, and seals tighter.

19. Automotive Inspired Bonded Windshield
    A REV RV exclusive, our Hide-A-Loft™ Overhead Bed System offers a capacity of up to 600 lbs and includes a queen mattress which is incredibly comfortable and easy to operate.

    Our exclusive extruded aluminum allows for too much wind noise. So, we use a higher-end solution that fits your motorhome's body better, latches more securely, and seals tighter. We use a higher-end solution that fits your motorhome's body better, latches more securely, and seals tighter.

21. Dealer Partnership
    We far exceed the industry standards of exposed seals and hinges with a more secure, latches more securely, and seals tighter. We use a higher-end solution that fits your motorhome's body better, latches more securely, and seals tighter.
The 2019 Flair has been completely redesigned for 2019. Changes are meant to better serve entry-level gas customers and offers more amenities as standards on each Flair.
Each Flair floorplan has all the well-thought out amenities of home. Your adventures are as endless as your imagination when you and your family make memories in a Flair!

Fleetwood RV is part of REV Recreation Group, a division of REV Group, Inc., a family of 33 industry-leading motor vehicle brands. At REV Group, we innovate, design and build products that connect and protect thousands of people every day—our trusted vehicles are engineered with the utmost rigor and precision to deliver the highest levels of performance, reliability, durability and safety.

**DISCLAIMERS**

1. GVWR (Gross Vehicle Weight Rating) is the maximum permissible weight of this fully loaded motor home. The GVWR is equal to or greater than the sum of the (UVW) unloaded vehicle weight plus the (OCCC) occupant cargo-carrying capacity.*

2. GAWR (Gross Axle Weight Rating) is the maximum permissible loaded weight a specific axle is designed to carry.

3. GCWR (Gross Combined Weight Rating) is the value specified by the motor home manufacturer as the maximum allowable loaded weight of this motor home with its towed vehicle. Towing and braking capacities may be different. Refer to Fleetwood and chassis manufacturer’s manuals for complete information.

4. Length measured from front bumper to rear bumper (excludes accessories).

5. Excludes safety equipment and awnings.

6. Motor homes feature a body width over 96” which will restrict your access to certain roads. Before purchasing, you should research any state and/or province road laws which may affect your usage.

7. Tank manufacturer’s listed water capacity (WC). Actual propane capacity is 80% of water listing as required by the safety code.

† The chassis manufacturer recommends the installation of a supplemental brake control system to activate the brakes on the vehicle or trailer you are towing. Hitch receiver ratings expressed are maximum for the hitch receiver installed and may require the purchase of additional equipment that is dependent on the weight of the towed load. Consult with hitch receiver manufacturer for further information.

* UVW and OCCC are found on the label containing the federal certification tag in each RV.

** Seatbelts and locations are shown in the brochure for display purposes only. Actual numbers and locations will vary by model.

*** All 2019 REV Recreation Group motorhomes include a limited one year/15,000-mile coach warranty and three-year/45,000-mile structural warranty, whichever occurs first, and is fully transferable for the first 12 months.

FLEETWOOD MOTORHOME ASSOCIATION
As a Fleetwood RV owner, you’re invited to become a member of the Fleetwood Motorhome Association (FMA). Becoming a member is the perfect way to meet other Fleetwood owners who love to travel across America and share in the RV lifestyle. Visit the FMA website at www.fma4fun.org to learn more and join the fun.

CONTACT US
To locate a dealer near you, visit our website at www.fleetwoodrv.com or call 1-800-322-8216. We can also be contacted at Fleetwood RV Customer Relations, P.O. Box 1007, Decatur, IN 46733.

IMPORTANT—PLEASE READ: Product information, photography and illustrations included in this publication were as accurate as possible at the time of printing. For further product information and changes, please visit our website at www.fleetwoodrv.com or contact your local Fleetwood RV dealer. Prices, materials, design and specifications are subject to change without notice. All weights, fuel, liquid capacities and dimensions are approximate. Fleetwood RV has designed its recreational vehicles to provide a variety of uses for its customers. Each vehicle features optimal seating, sleeping, storage and fluid capacities. The user is responsible for selecting the proper combination of loads (i.e., occupants, equipment, fluids, cargo, etc.) to ensure that the vehicle’s capacities are not exceeded.
