THE FORMULA TRAILERS ADVANTAGE

BUILT TO A HIGHER STANDARD

Formula has been known for innovation, durability and unequalled performance. Formula offers a wide selection of trailers with unbeatable features and value. Whether you need a specially-customized trailer for your business or a no-frills trailer for everyday towing, Formula has the perfect solution.

1 TUBE MAIN RAILS

Lighter than I-Beam competitors while providing more torsional rigidity. Our trailers haul more and last longer.

2 FULL HEIGHT Z-CROSSMEMBERS

Standard on all steel frames, Z-shapes maximize strength without adding weight. This provides you with a true unibody frame.

3 FULLY WELDED WHEELBOXES

Protect your valuables from the elements by tying the wheelbox to the elements. This prevents dust and debris from blanketing your cargo.

4 REINFORCED PLATE

7 ga steel bentline reinforces the tongue assembly to the main rail. This distributes the forces over a wider area and picks up the full strength of tube tongue members.

5 DUST WALL DESIGN

Featured on 8.5' models, it prevents water, dust, and debris from entering the interior and inner wall cavity while adding strength as a structural component. All other models are sealed by the wall sitting on the frame rail.

6 CROWNED TUBE ROOF BOWS

Superior to stamped hat sections, crowned tube bows transfer vertical loads to the sidewalls for added strength and shed water more effectively than flat roofs.

7 ELECTRIC BRAKES

When it comes to safety, we will never cut corners. Gel-coat fittings are used on all brake connections. All tandem and triple axle models have brakes on all axles.

9 HEAVY DUTY HINGES

All ramp doors are standard with heavy duty hinges, grease zerks and a solid 3/4" steel rod for added strength.
