

KEY WEST BOATS

Key West Boats

We believe that everyone deserves the chance to unwind on the water.

For over 35 years now our passion has been to build the best value on the water. In order to do that every Key West boat gives you:

- More standard features than anything else in its class.
- Uncompromised attention to safety including positive, level, and upright flotation in every model.
- Unsurpassed resale value and reliability.
- No wood construction combined with lightweight coring materials and directional high strength glass to give you many years of low upkeep and fuel efficient performance.
- Privately owned, built, and backed for over three decades with one of the most liberal, least needed warranties in the industry.
- Extensive dealer network from Maine to Florida and beyond so you'll always be near the Key West family.

Key West Boats is a family of passionate employees still working hard to deliver a product that places equal importance on both quality and value. We take great pride in our final product, and we're committed to building a boat, and customer relationship, that lasts. We do that by bringing an artist's attention to detail to every square inch of space, from the drive, to the ride, to the cast and catch. Because we know that the memories you make on the water are the memories that last a lifetime. And we want them all to be perfect.

So whether you dream of stretching out beneath a T-top after a long week at work, standing on a deck to teach your child how to cast their first line or catching that final Sunday sunset as the weekend winds down, we're here to provide that welcome refuge from life's daily grind—because we believe that everyone deserves the chance to unwind on the water.

We back every boat with a **TEN YEAR structural hull warranty**.

Our **NO WOOD/NO ROT CONSTRUCTION** will provide you with years of dependable service.

Standard Features on Most Key West Boats Include:

- 10-Year Structural Hull Warranty
- Positive, Level, and Upright Flotation
- Foam Injected Fiberglass Stringer System
- Stainless Steel Hardware and Rails
- Courtesy Lights
- Molded Non-Skid Inner Liner
- Bilge Pump with Auto Switch
- Built-In Fuel Tank
- Raw Water Wash Down Kit
- Folding Stern Light
- Compass
- Power Outlet Plug on Dash
- Horn
- Self-Bailing Cockpit
- Stainless Steel Rod Holders w/Drain
- Polished Stainless Steel Wheel
- Water Resistant Switches

Key West reserves the right to remove or replace any feature for special packages.

Proudly partnered with Yamaha and Garmin.

Your KEY to Performance and Quality

Beyond Unsinkable

All Key West Boats have closed cell foam flotation exceeding USCG regulations. Unlike some others, Key West voluntarily provides positive upright flotation in our 20' and larger models, making our entire line of boats unsinkable, even when damaged.

At Key West Boats we like to refer to our boats as possessing 'Positive, Level, and Upright Flotation'. The USCG uses this terminology with the definition being that some of the boat can be submerged as long as an acceptable percentage of the top edge is above water and sitting level and upright. This should allow the passengers to remain in the boat. Therefore the Key West boat is beyond unsinkable in the respect that it not only floats when swamped but does so with the right side up.

Materials and Assembly

Our assembly process is structured and monitored closely. Hardware is through bolted using 316 stainless steel fasteners. All screws, washers, nuts, and bolts are 316 stainless. This helps to reduce "bleeding" of hardware. We use only the highest quality raw materials at Key West Boats. From our UV-resistant gel coat to our various woven and knit fiberglass products, you can be sure that your boat is structurally sound. By hand laying different types of glass in designated areas of stress we assure proper structural integrity in our decks and hulls. In addition, our stringer system design and application provide unparalleled hull strength and rigidity. Our stringer systems are made in-house out of the same fiberglass that is used in the hull lay-up. Through our assembly process our stringers "become" part of the hull and not an add-on piece, all adding to the overall strength and durability of the hull. Lid openings are precisely cut with a template and router system. This ensures a proper fit for replacement parts if needed in the future. All of our boats have closed cell foam flotation exceeding USCG regulations. We voluntarily foam fill our 20-foot and larger models, making our entire line unsinkable, even when damaged.

Safety

Positive, level, and upright flotation is standard on every model from 17' to 29' providing a stable platform when swamped which allows passengers to stay safe in the boat and out of the water. Each model is subjected to rigorous flotation testing to assure the security of you and your family. At Key West Boats, safety is our top priority.

Stepped Hull

Key West Boats utilizes a unique step in some of the hulls starting with the 219FS and including up to the 291FS. The purpose of our step is to improve the ride with an increased angle of entry in the forward part of the hull, transitioning into a lesser angle in the rear for improved low-speed planing ability and better stability at rest. Conventional hull designs must sacrifice somewhere, but with the Key West exclusive step design, you can finally have the best of both worlds.

Engine Pod

This design adds extensively to the interior room of any boat it is used on by moving the engine back and out of the cockpit. All outboard engines must have clearance in order to tilt and that required space absorbed in the splash well area. Therefore an 8" set back as on the 219FS for instance adds that same 8" to the floor space directly in front of the rear bench seat. Our Family Sportsman (FS) models utilizing this feature have some of the largest open cockpits in their class. The same is true for our Bay Reef (BR) models. In the 210BR for instance the engine pod is instrumental in allowing this bay to have more rod storage than any boat in its class, more dry storage, and even the changing room under the console. Every inch of space is used to provide the most feature-friendly boats combined with unsurpassed maneuverability for passengers. And the advantages go on. The size and angles of the engine pod combined with the overlapping deck design result in one of the strongest transoms in the industry, crucial in boats where an engine jack plate will add leverage to the already tremendous forces exerted by an engine running through rough water. Another advantage is the ability to run the engine higher in shallow water, and the added leverage allows the engine to create more lift with less trim. This results in more speed with less fuel consumption, and that is a win-win for everyone. To see for yourself check out any of the pod-equipped Key West Boats and compare them to the competition. This is one of the most beneficial features to be incorporated on any sport boat in many years.

Family Sportsman

From the 179FS to the 291FS, the Family Sportsman Series has a model to fit the needs of any modern active family. With emphasis on comfort, fishing, and safety, your Family Sportsman will feature more seating and storage, even a changing/potty room, while having the fishing features you would expect in any center console design, like rod racks, trolling rod holders, live well, and even a macerated fish box in some models.

291FS

179FS

The 179FS is built specifically for the active family that appreciates the versatility and mobility of a smaller boat while still allowing them to have the fishing and cruising features normally only found in larger boats. The 179FS combines all of that into a package that can fit in an average residential garage and be towed by most modern SUVs. The updated hull design provides spirited performance and superior fuel economy from a modest 90 HP or can be maxed out with the 140 HP option. Although it's just shy of 18 feet, it still has great features like a folding jump seat in the rear deck, easy bilge access, extensive storage, and even molded-in rod racks—benefits typically only found in larger designs.

189FS

The 189FS offers the most family features possible in a smaller vessel while still being able to handle a serious fishing trip. This is a family-oriented center console with less emphasis on hard core fishing and more on the water sports many families enjoy, such as skiing, tubing, camping, or just cruising on the waterway. It features more seating, cup holders, and storage to accommodate all family members, but we never forget the fishermen. It also includes molded-in rod racks and a generous live well. The bench seat in the rear features removable cushions to convert it to a nice fishing deck as well.

203FS

The 203FS elegantly brings together the perfect balance of styling, performance, and comfort. The 203FS captures the pleasant feel of a boat that behaves just the way it should. It perfectly executes a dependable response and handling at any speed to create a smooth and effortless ride. It features a forward-facing seat and bow cushion option that provides comfortable and secure seating for even the adult-sized passengers. It also has a standard full-width bench seat in the rear that doubles as a sun lounge or casting platform.

219FS

The 219FS is a large boat with more floor space, rod storage, dry storage, and seating than the competition. The spacious front deck can effortlessly switch between comfortable forward faced seating with backrests to twin dry storage or fish boxes as you need. The console houses a large changing room that doubles as a tremendous storage space. The dash panel will flush mount up to 12" screens, and most radios, gauges, and controls. The rear bench seat has fully lined storage areas underneath the comfortable seating and the swinging transom door offers easy entry for swimmers.

239FS

The Key West 239FS is the answer to the question of whether a boat can fish hard on Saturday and then capture family fun on the water on Sunday. It provides plenty of roominess and fishing features to bring home the big catch while also providing the comfort features of a relaxing bow lounge and an aft bench seat that can easily accommodate five across.

291FS

The 291FS represents the largest in our fleet of Family Sportsman Boats. The vessel comes standard with an under-deck windlass, fuel fills on both sides, and side entry doors on each side; one with a hidden ladder and one with a beach anchor. For creature comforts, it is outfitted with wraparound bow seating, slide-out lounge seats on the console front, a lined console interior with a freshwater sink, and a huge dash space for a custom instrument layout. For fishing, it offers dual live wells, large molded-in rod storage racks, plenty of rod holders, an under-deck macerated fish box, and even a Seakeeper option.

Bay Reef

Ranging from the versatile 188BR to the expansive 250BR, the Bay Reef series will meet all of your inshore or near-shore fishing demands. Whether you are a recreational fisherman or a hardcore tournament angler, there is a Bay Reef to fit you. Every model includes two standard livewells, accommodation for even the longest fly rods, and the most storage and deck space in its class. The Bay Reef series also sports a bit less draft for improved performance and a great ride.

188BR

This nimble hull design performs well with a 115 HP engine while the aggressive entry provides a smooth and dry ride. The 188BR is the latest addition to the bay boat line up offering big water performance in an economical to own and operate package. Fishing features include front and rear live wells, generous rod storage, and a huge front casting deck. For convenience it offers easy bilge access via a lift out storage tub and both the cranking and troll motor batteries can store out of the way under the console floor.

210BR

The 210BR has been specially crafted so that there is room for everything that a serious fisherman needs. The interior has been tweaked and squeezed to get everything a serious fisherman could ask for such as space for 10 seven-foot rods in the lockable rod boxes, dual live wells, spacious front and rear deck, under gunwale molded-in rod racks, and the first bay boat in its class with a potty room under the console. It is a family-friendly bay boat as well with features such as fold-away jump seats in the rear deck, and generous cup holders throughout.

230BR

The 230BR is packed with features that can satisfy any fisherman, from the casual weekend sportsman to the tournament champion. This boat shares the tremendous rod storage capability of the 210BR, and the added length and beam provide a lot more open cockpit space. Those factors combined with added depth, both inside and out, creates a great inshore boat with reasonable open water capability.

250BR

The largest of the Bay Reef series, capturing all the features you could ask for in a bay boat. It features an expansive uninterrupted bow fishing deck, as well as long under-gunnel rod storage capable of holding 9'+ fly rods, and tournament-sized live wells in the front and rear. It has expanded storage under the back deck, with the battery storage under the console so you can put up to five batteries completely out of the way. The expanded floor space allows for options such as the expanded lounge seat on the console which incorporates a huge macerated fish box or you can opt for the open floor plan with the standard console. If you are a live bait fishermen you can also add the huge live well leaning post, or stick with the standard leaning post and enjoy the open space it provides.

Center Console

The series starts with the 1720CC for the inshore enthusiast, and ranges all the way up to the 244CC which is capable of serious offshore action. Our Center Consoles are some of the best appointed boats on the water because of the versatile range of utility found in every model, whether you're headed fishing or out for a casual day on the water with family. You can expect to find extensive rod holders and storage capacity, live wells, generous cockpits, and fish boxes in this series, and even a few options for creature comforts such as bow cushions and jump seats.

Dual Family Sportsman

The Dual Family Sportsman series is designed to provide the best in comfort and safety while maintaining plenty of utility. The family will enjoy the comfort of extensive seating at the bow and a wraparound bench seat at the stern as well as the utility of the wraparound windshield and the increased fishability brought by the rod racks, rod holders, and live wells. These saltwater-friendly runabouts also feature a built-in swim ladder and a swinging entry door that water sports enthusiasts will enjoy.
