CE AND SAS-TEC

CE CERTIFICATIONS

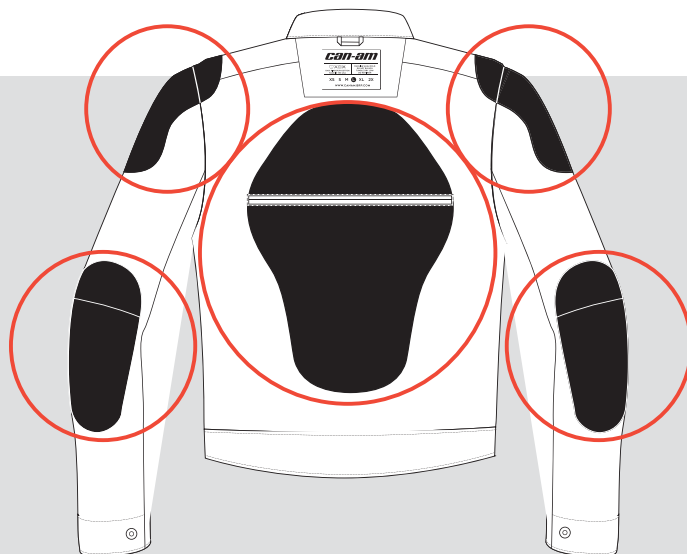

Let's face it, getting riding gear and equipment that will protect you on the road can be complex. With a wide variety of different laws, certifications, and rating systems, it can all become very confusing very fast.

However, you can ride assured when you see the CE symbol on your Can-Am gear. These products have gone through significant testing and meet the stringent requirements necessary to earn this certification.

All of our CE certified items have passed the following tests: impact abrasion resistance, tear strength, seam strength, wash testing, and chemical testing.

So when you see the CE mark on your Can-Am gear, you can ride with peace of mind knowing your equipment has you covered.

CE

SAS-TEC PROTECTORS

Our riding jackets include removable SAS-TEC protectors in the shoulders and elbows, as well as a zone for a back protector (sold separately). SAS-TEC protectors are low-profile, modular and, most importantly, highly effective shock absorbers.

Feature highlights

1 Liquid-cooled system

Industry-leading cooling system: battery, inverter, on-board charger and motor are liquid-cooled. Liquid cooling offers a more efficient cooling process, optimizing charging speed and performance in almost any conditions compared to an air-cooled system.

2 10.25 in. touchscreen display with BRP Connect and Apple Carplay

A high-resolution infotainment system that puts an interactive, informative and customizable experience that's both seamless and simple right at your fingertips.

3 Chaincase

The chaincase protects the high-quality silent chain from the elements and keeps it lubricated with oil. An automatic tensioner ensures perfect chain tension without the need for regular maintenance.

4 Passive and active regen

Passive regen and active regen both return energy to the battery and contribute to the motorcycle's deceleration. Active regeneration, which is used by turning the accelerator forward, gives back even more energy to the battery and offers greater deceleration. Both types of regen can be adjusted.

5 Lightweight architecture

The battery is an integral part of the chassis, reducing the number of parts and the overall weight of the motorcycle, making it very agile and easy to handle.

6 Off-road performance

Front and rear KYB suspension with 10 in. (255 mm) of suspension travel to overcome difficult trails in comfort and confidence. 21" front and 18" rear knobby tires providing good grip on different types of terrain.

Feature highlights

1 Liquid-cooled system

Industry-leading cooling system: battery, inverter, on-board charger and motor are liquid-cooled. Liquid cooling offers a more efficient cooling process, optimizing charging speed and performance in almost any conditions compared to an air-cooled system.

2 10.25 in. touchscreen display with BRP Connect and Apple Carplay

A high-resolution infotainment system that puts an interactive, informative and customizable experience that's both seamless and simple right at your fingertips.

3 Chaincase

The chaincase protects the high-quality silent chain from the elements and keeps it lubricated with oil. An automatic tensioner ensures perfect chain tension without the need for regular maintenance.

4 Passive and active regen

Passive regen and active regen both return energy to the battery and contribute to the motorcycle's deceleration. Active regeneration, which is used by turning the accelerator forward, gives back even more energy to the battery and offers greater deceleration. Both types of regen can be adjusted.

5 Outdoor motorcycle cover

Protect your motorcycle from the elements with this high-quality all-weather motorcycle cover. An access port allows you to charge your motorcycle while the cover is in use.

6 Pulse '73 package

Premium package with exclusive Sterling Silver Satin coloration, dedicated trim, "73" badges and a LinQ gauge spoiler.

3 CHEST / BUST	Measure under your arms, around the fullest part of your chest.
4 WAIST	Measure around your natural waistline, keeping one finger between the tape and body.
5 HIPS	Across the widest part of the seat.
6 INSEAM	Without shoes, from the crotch to the floor.

CE AND SAS-TEC

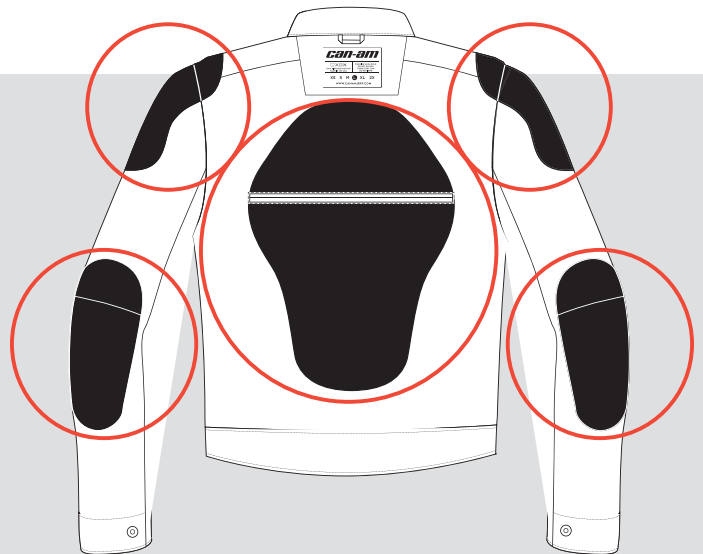

CE CERTIFICATIONS

Let's face it, getting riding gear and equipment that will protect you on the road can be complex. With a wide variety of different laws, certifications, and rating systems, it can all become very confusing very fast.

However, you can ride assured when you see the CE symbol on your Can-Am gear. These products have gone through significant testing and meet the stringent requirements necessary to earn this certification.

All of our CE certified items have passed the following tests: impact abrasion resistance, tear strength, seam strength, wash testing, and chemical testing.

So when you see the CE mark on your Can-Am gear, you can ride with peace of mind knowing your equipment has you covered.

SAS-TEC PROTECTORS
