PJ TRUCK BEDS

WHAT DRIVES YOU, DRIVES US.

Since 1990, PJ Truck Beds has focused on the same factors that drive you - safety, durability, and innovation, giving you the feature-rich products you need to dominate the task at hand. You see, whether you are at work or play, our engineering team has remained focused on making sure you make it home to your family safely, every day. Headquartered in Kingston, Oklahoma, PJ Truck Beds produces its truck beds in our over 350,000 square feet of manufacturing space and employs more than 450 experienced laborers and sales associates. As the leader in innovation and feature-rich truck bodies, we bring the focus and attention to detail every day to ensure that you are equipped with the tools you need to get the job done, whether at work or play.

With more than 75 distributors nationwide who bring many years of industry expertise in upfitting truck bodies, you can trust and rely on our dealer network to deliver a best-in-class customer experience before and after the sale. You can trust our premium features to work hard for you everyday, whether it is our independently-rated B&W hitches, one-piece tubular headache racks, lifetime warranty LED lights, or our integrated toolboxes with D-Bulb weatherstripping. Driven to bring the best features to the marketplace, PJ Truck Beds remains steadfast in leading the way in innovation for the ambitious and adventurous because what drives you, drives us.

AL GB

ALUMINUM STANDARD TRUCK BED

Hard work and attacking the open road are two great feats that can be accomplished with the ALGB. Whether you're on the jobsite or playing in the mud on the weekends, our ALGB offers higher payload and towing capacities than any unit on the market today. Best of all, our one-piece headache racks and extruded tongue-and-groove aluminum floors are essential to ensuring you can haul the heavy equipment you need on your aluminum body.

WHAT DRIVES DRIVES US

THE ALL-IN-ONE SBC
CRANE BODY

When it comes to flat decks and service bodies, PJ Truck Beds has kept the needs of the customer at the forefront since 1990. That legacy continues with the SBC Crane Body line-up—a rugged, feature-rich all-in-one solution built to perform in the toughest environments.

Engineered with a reinforced side pack structure and a universal mounting plate, our SBC Crane Bodies are built to support 3,200 to 6,500 lb. crane options from trusted partners like Tiger and Auto Crane.

Need industry-leading storage? The SBC delivers. With standard pistol-grip master locks, locking T-handle compression latches, customizable CTech drawer packages, and taller side packs, the SBC keeps your tools secure, accessible, and organized.

Want to get more done on the jobsite? Equip your SBC with our optional workbench tail shelf bumper—complete with outriggers, dual vice mounts, and a best-in-class B&W 24.5K lb. receiver hitch. It's built for the trades that need their truck to be a mobile workstation.

SBC CRANE BODY LINE-UP

SB C

STEEL REINFORCED CRANE BODY

Our customizable service body is designed to help you dominate. With the added strength in our reinforced crane body, you will be able to safely and efficiently master any job you step on to. With optional cranes from Tiger, Auto Crane, and Venco, our commercial and fleet customers will bring the necessary lifting tools to the jobsite. Bundle that with all of the customizable options from America's most customizable service body with workbench bumpers, custom-fitted drawers, headache racks, and more - you've got one of the best crane bodies in the industry.

EPOXI SHIELD
THE NEW STANDARD IN POWDER COAT

AMERICA'S MOST DURABLE & TRUSTED

POWDER COAT SYSTEM

Our all-new epoxy-based powder coat system, EpoxiShield, sets a new benchmark for durability and performance. Built from the ground up by our engineering and leadership teams in collaboration with IFS Coatings, this best-in-class system is designed to withstand the harshest elements and toughest jobsite conditions. Featuring a zinc epoxy-based primer and a super-durable polyester top coat, EpoxiShield delivers superior corrosion resistance and long-lasting finish—no matter where the job takes you.

Our zinc epoxy based primer system with a super durable polyester top coat creates a stronger bond to the metal creating less permeability for the coating where air, water, and salt cannot penetrate the metal so quickly.

Our rugged polyester top coat stage of our paint process adds increased mar and scratch resistance and is designed for excellent color and gloss retention over 5 years.

This system provides excellent substrate adhesion when curing bond around metal edges, welds, and corners providing best-in-class edge coverage.

KEY FEATURES OF EPOXISHIELD

WHAT DRIVES DRIVES US

TRUSTED QUALITY. INNOVATION.

FIRE RESCUE EXCELLENCE.

Whether you're a large municipality or a volunteer fire department, PJ Truck Beds has engineered the SBF Fire Rescue Body—available in both wet and dry configurations—to meet your team's toughest demands. Built on over 35 years of trusted craftsmanship, the SBF delivers best-in-class availability, value, and performance. It's designed for speed, efficiency, and reliability, giving crews rapid, easy access to tools, lighting, and life-saving equipment the moment they're needed most—because what drives you, drives us.

To ensure that same quick, dependable access, we've partnered with Hansen International to provide the industry's most trusted toolbox doors—because we understand the urgency and precision your crews operate under.

Every SBF also comes standard with mission-critical LED door-ajar lighting, helping ensure no compartment goes unnoticed when seconds count. And with our optional heavy-duty cargo drawer systems, equipped for smooth, one-hand-ed operation, fire and rescue teams can effortlessly retrieve essential gear on the go.

At PJ Truck Beds, this commitment reflects our focus on empowering fire and rescue crews across North America—providing best-in-class tools and dependable innovations that support their critical, life-saving work. With the SBF Fire Rescue Body, you're not just getting a truck body—you're gaining a trusted partner in performance, reliability, and the mission to save lives.

DRY

STEEL DRY FIRE RESCUE BODY

When lives are on the line, we understand the speed and efficiency your fire rescue teams need to operate with. We also recognize the easy-access features your crews depend on—like on-scene heavy-duty cargo slides, Hansen roll-up doors, and adjustable shelving on Uni-Strut systems. The same concerns your team faces when responding to emergencies are the ones our team is focused on—because what drives you, drives us.

INDUSTRY LEADING

FIRE & RESCUE FEATURES & OPTIONS

HANSEN ROLL-UP DOORS

A standard feature on both our enclosed and open-deck SB Fire Rescue Bodies, Hansen Easy Access Roll-Up Doors give first responders rapid, one-handed access to essential tools and supplies—exactly when every second counts.

ON-SCENE HD CARGO SLIDES

With a 1,000 lb weight rating, these optional cargo slides come with an anodized aluminum frame, urethane wheels, stainless steel fasteners, and an easy-access release handle to help emergency response professionals respond quickly.

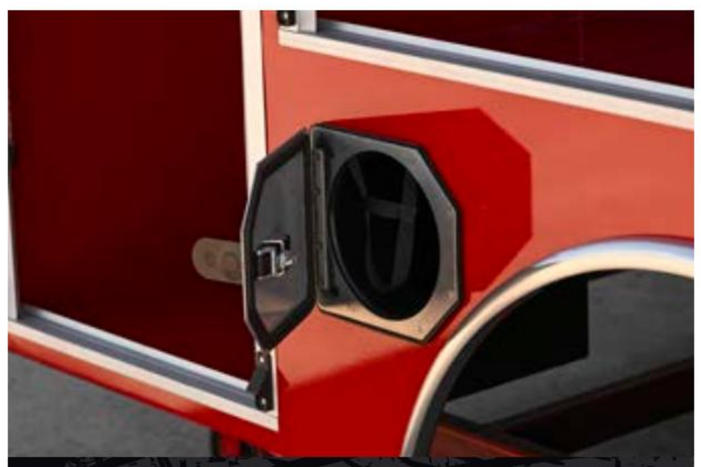

UNI-STRUT WITH SHELVING

If you need standard galvanneal shelving that's fully customizable, equip your fire and rescue unit with adjustable shelves and dividers that move up or down on a uni-strut system.

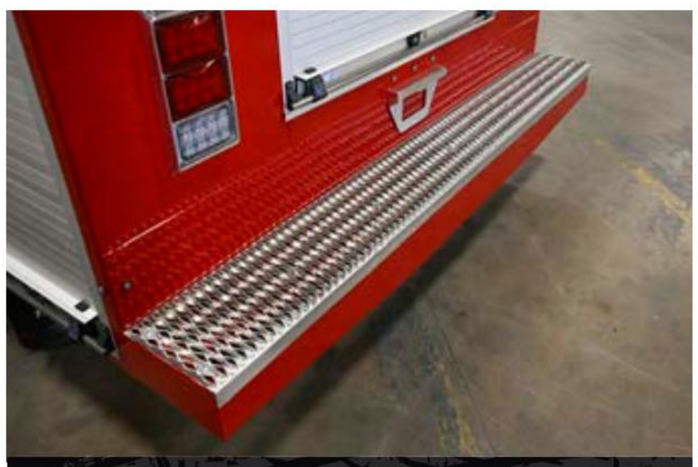

LED STRIP LIGHTING

Available in dry or wet units, the SBF Fire Rescue Body keeps you a step ahead with standard LED strip lighting that automatically activates when Hansen sliding doors open—so you can quickly find what you need, exactly when you need it.

SCBA BOTTLE HOLDER

With this optional streetside bottle holder on the streetside of the SB Fire Rescue Body, emergency responders have a conveniently located oxygen recharge location for their crews. It also adds a little flare to what is an impressive-looking fire unit.

GRIP STRUT BUMPER

You don't have time to plan your entry into a fire rescue scene. With a standard Grip Strut bumper, you can safely access your often unpredictable environments. Its tapered design provides versatile departure angles to tackle the most challenging terrains.

REAR VERTICAL LED LIGHTING

We know function and safety are essential in your operations, but we also understand you want a unit that stands out on the highway. Our standard, stacked rear LED tail lights deliver a sleek, professional look while keeping your team safe.

CUSTOMIZABLE DECK SPACE

On our wet units, fire and rescue teams will find a safe, durable, and fully customizable 11-gauge galvanneal steel deck, engineered to securely mount tanks and slide-out accessories—giving you the flexibility and readiness they need when emergencies strike.

AL **FB**

ALUMINUM BRUSH TRUCK BODY

Built from corrosion-resistant aluminum, the Aluminum FB delivers a lighter, more efficient design without compromising durability or performance. Its safe front operating zone allows firefighters to confidently control brush trucks while protecting their communities. With curbside and streetside manwells, crews can operate the unit safely from the deck area, giving them the precision they need to strike the heart of the fire with accuracy and confidence.

FEATURES & OPTIONS

LENGTHS	9’4”, 11’4”	**MANWELL PIT**	SS & CS Front Man Pit with Gate
DECK	1” Extruded Aluminum	**BP HITCH**	Optional ICC Bumper with B&W 24.5K lb. Hitch with 2.5” Receiver Tube

OPTIONAL FEATURES INCLUDE: ICC Bumper with B&W 24.5K lb. Hitch with 2.5” Receiver Tube

FB

STEEL BRUSH TRUCK BODY

Built for fire service professionals, the Steel FB provides a fully customizable workspace along with a safe, front-facing operating zone designed for precise control of brush trucks in the heat of the fight. With curbside and streetside manwells, crews can operate the unit safely from the deck area, giving them the ability to target the heart of the fire with accuracy and confidence.

FEATURES & OPTIONS

LENGTHS	9'4", 11'4"	**MANWELL PIT**	SS & CS Front Man Pit with Gate
