

here's a place that feels like home. It's nestled in the shimmering aspen leaves of the Rockies, or beneath a Spanish moss canopy down south. The place is Vectra, one of the most thoughtfully designed highline motor homes ever built. Vectra has everything you want in a home. The comfort of hand-crafted

furniture. The space for your hobbies. The convenience of a delightful

kitchen. As a pioneer, Vectra is everything other motor homes strive to be.

the way. The forwardmounted rearview mirrors

increase your visibility and minimize blind spots. The side entrance comes with automatic electric steps that extend when the entry door is opened. An acrylic awning is now available as an option. And as you might guess from the size of the windows and windshield, the view from here is spectacular.

high point of the exterior is the patio entertainment center option. It includes a large pull-out picnic table, a

We start the tour on the outside. Vectra is designed to offer more space than any other motor home created by Winnebago Industries, and we've gone the extra mile to maximize the use you'll get out of it. Along both sides is lighted and lined basement storage, complete with gas struts to hold the doors as they swing up and out of

complete stereo system and TV connections. These sorts of practical features are precisely what makes Vectra stand out as one of the most livable motor homes.

hough we've gained our popularity by building a well-designed home, the feel behind the wheel is equally important. Vectra's surprisingly easy to handle and manuever, and with the well-located switches, rear monitor and stereo, driving

is a true pleasure. The switches' large, easymoving rocker design provides convenience right at your fingertips.

Special driver features include multi-position tinted sunvisors, cruise control, map lights and a 4-speaker AM/FM cassette stereo.

You also have the option of the remote controlled multidisk CD player for hours of listening pleasure. In the driver door photograph, you can see the power windows, the 6-way power adjustable captain's seat, the HVVH® 4-point, bi-axis, hydraulic leveling system and heated remote control mirrors – just some of the many features offered on the '94 Vectra.

Vectra was designed from a blank sheet employing a strategy called Home Comfort Design. Before anything is implemented into the vehicle, it must meet our standards of practicality, comfort and beauty. Net result is a wonderful and efficient motor home.

The livability is especially evident on the interior.
Like many Winnebago Industries motor homes, the comfortable, high-back cab seats swivel back to the lounge area. Because the driver platform is level with the living area floor, it's much easier to get in and out of cab. The

engine is in the back of the pusher model shown, adding even more space to the forward area.

Overhead, the optional
19" color TV and VCR
come with remote speakers
to create a complete
television entertainment
center. Everything is
remote controlled. The
tinted glass doors hide the

VCR and switching system. You can further enhance the entertainment center

during the day by dimming the outside sun with the translucent day-nighter window blinds. The dual purpose blind also has an opaque element which,

when pulled down at night, will insure that you have complete privacy.

LIVING

The kitchen is another good example of how Home Comfort Design works. First, you have all the necessary features of a home: a large oven, a low-

s you move back through the motor home, cushioned by the thick carpeting, examine the craftsmanship and attention to detail of the decor. Unlike competitive motor homes who use outside companies to help create the furnishings, most of Vectra's furniture has been handcrafted in our Forest City plant to fit our specifications exactly.

mounted microwave, a range hood, a large double-doored refrigerator, a recessed double stainless steel sink and an Everpure® water purification system. The recessed 3-burner range is also standard with a bi-fold cover and has one high-output burner for meals that need

the extra heat or for cooking in high altitudes.

Depending on the model, you can choose from a

dishwasher, a coffee maker, an ice maker and a combination microwave/convection oven to name a few. We finish it off with beautiful woodwork, a china

closet (34RA), and if you desire, an optional free-standing dinette and oak-plank flooring. The result is a truly delightful working kitchen.

he tour of the interior continues in the bedroom.

It's easy to relax in a bedroom this well designed. Not only is the room impeccably coordinated from window treatments to pillow shams, it's comfortable, with a walk-around Sealy® Innerspring queen bed, twin nightstands

and reading lamps. The bed lifts for even more storage.

As for bedroom amenities, each floorplan has expansive room in the wardrobe for even the most fashion conscious. You also have the option of adding a remote-controlled color TV in a corner cabinet or in the rear wardrobe. And consider the stereo with an AM/FM auto-reverse cassette deck and an alarm clock. The bedroom also comes with its own generator switch.

n the bathroom you'll notice the sensible amenities and use of space. Bathroom design varies from floorplan to floorplan, but each has exceptional space for towels, multiple storage cabinets, drawers, a large sink and a convenient second water pump switch. The 37' floorplan has a separate makeup area from the sink, which includes makeup lights,

a comfortably padded vanity stool and twin wardrobes with drawers.

A special addition for this year is the choice of the elegant 35th Anniversary color scheme. As with all of

our color themes, it's

coordinated throughout –

from window dressings

right down to the carpeting.

Of course it's nice to have such a deluxe interior, but the Vectra also incorporates

SYSTEMS

a healthy measure of unseen value in its solid construction and attention to detail where it really counts. The solid steel frame is one of the best in the business. Add to it our exclusive Thermo-Panel® construction and a thick 4-inch, insulated roof with front-to-back air conditioning ductwork.

It's remarkable how our construction stands up against other comparably priced motor homes.

Vectra's holding tank area is another place where we spent time designing it for RVers needs. The heated compartment includes easily accessed valves, a practical plastic floor with a trap door, and a standard

pull-out shower for quick clean ups. This kind of sensible thinking is evident everywhere.

ach floorplan is unique and individually built to the special considerations of the length and design. There are some features which are standard throughout, like the roofmounted luggage rack. But we were also able to take advantage of specific design intricacies to give

Note: Dimensions shown are for sleeping space only. Dashed lines denote overhead storage area. Patterned area indicates optional planked wood floor covering.

our customers something extra; an example of this is the access to the underbed storage through the locking exterior door on the 33RQ and 31RQ.

When it comes down to it, the details are what made Vectra one of the most popular new motor homes of last year. For those who have been searching for a

motor home designed with luxury in mind, with an ingenious use of space and sensible, elegant style, Vectra is a place you can call home.

Home. It's What We Do Best.

For 35 years, we have led the quest to create the best home on the road. As a

result, Winnebago Industries has the largest and most advanced motor home manufacturing complex in the world. Computer-aided design and manufacturing controls our building process, from pre-

testing to the finishing touches. We also run extensive tests on joint stress, climate performance and road conditions.

You have an open invitation to visit us and see what sets a Winnebago Industries

motor home apart from the rest. Call us at (515) 582-3535 for more information.

Protect The Best Years Of Your Life.

Unbelievably, Winnebago Industries is one of the only RV manufacturers to use automotive, 3-point seat belts on most models. Our motor homes also have detectors for carbon monoxide, LP leaks and smoke. It's all part of our extra effort to create a safe environment.

No Surprise That Our First Innovation Had To Do With Comfort.

Thirty-five years ago, our first task was to create a comfortable seat cushion. Today we continue with a new strategy to insure our motor homes are the most livable: Home Comfort Design. It pushes us to make the best use of space for living, storage and style. You'll feel the difference.

Get Your Promises In Steel.

Each motor home we make has a steel cab substructure that protects you and assures the integrity of the vehicle for years. Steel may seem like common sense, but the fact is, many others still use wood for their foundations and sometimes even their firewalls.

Beauty Is Built In.

We're proud to say we produce many more of our own components. Sure, we could buy them off the shelf. But by building our own furniture and cabinetry, we guarantee they fit exactly. It also allows us to provide things like Scotchgard™ Protector as standards. We're a company that believes this kind of perfection is important.

You're In Good Company.

We make it easy to be an enthusiast. With the Winnebago-Itasca Travelers

(WIT) Club, you can meet Winnebago Industries owners in your area and access special services like professional trip routing and mail forwarding. The WIT Club Magazine will keep you up-to-date on rallies and caravans

The fun continues when you join Winnebago Motorsports. Created to pay homage to the world of motorsports, you'll see us everywhere from car races to speedboat events. We provide hospitality at events, a full compliment of racing merchandise and chances to meet the racing celebrities.

The Great Wall Of Winnebago.

Every Winnebago Industries motor home has our innovative Thermo-Panel® wall structure insulating and strengthening the shell without adding a lot of weight. When the cold snap comes through, you'll be glad we thought of it.

You Are Not Alone.

If you need help on the road, Winnebago Industries' free round-the-clock Road Assistance Service is a phone call away. It's part of our Preferred Care program taking care of you down the road.

We also have one of the most comprehensive warranty packages in the industry. The standard warranty protects your motor home for 12 months or 15,000 miles. At expiration of the basic warranty, the coverage continues for 36 months/36,000 miles on structural components. A 10 year limited warranty protects the roof and walls, and the 100% stain-free carpeting carries an extensive stain and wear warranty. We can provide this kind of coverage because our vehicles last. In fact, they have the highest overall resale value of competitive motor homes on the road
