#1 Selling Class B Motorhome!

Since 1990
You've got it ALL!

It’s all yours with Roadtrek: the comforts of a larger motorhome with the parking ease, drivability and styling of a full-size SUV or luxury van.

Whether you’re heading cross-country or cross-town, why not have all the comforts of home: your own bathroom, change room, kitchen, living room and bedroom. Add the performance, fuel economy, parking ease and towing capacity of a van, and you’ll see why Roadtrek is the #1 selling class B motorhome (camper van) in North America - since 1990!

Comfort First - Always!

Getting there should be half the fun! With lumbar supports in the front captain’s seats, ample legroom, a large panoramic sunshields window and oversealed windows, you’ve got a vehicle that provides a superior driving experience. After a day on the road, you and your companions can bed down in home-style comfort. Roadtreks sleep up to four - with one or two single beds up front (requires optional folding mattresses), and up to a king-size bed in the rear. Enjoy sweet dreams on high-grade dual-density foam cushions - with no bumps or gaps.

Go ahead - Stretch Out!

After your day’s travel, swivel the captain’s seats around to open up a spacious seating area. Even if it’s just the two of you, four seats at the front (on some models) provide more openness and space to eat, entertain or relax with another couple. A third seat (on most models) and one of the captain’s seats provide an eating area for two at the front that’s much easier to use than just two captain’s seats. Being able to dine at the front allows you to leave the rear made up for sleeping, full time. You can wake up and retire at different times plus you don’t have to set up a sofa or dinette to eat every morning, or make up a bed every night. Now that’s real “utility”! (If you prefer more storage, the second row seat(s) can be replaced with an armowre and/or a removable wardrobe.)

Hold Your Head High!

By lowering the floor on Chevy models, there’s plenty of headroom without requiring an exceedingly high roof (a lower roof provides better fuel economy, handling, overall height and appearance). It also allows for easier entry and exit and a more comfortable counter height. The aisle is up to 32” wide, so 2 people can pass with ease.

Privacy When You Need It!

Roadtrek 170 and 180 models let you create a spacious temporarily enclosed bathroom with a stand-up shower or change room in the aisle in a matter of seconds using fold-down privacy doors. The hygienic sink liner allows you to perform personal hygiene in the galley sink without sacrificing space or cleanliness for food preparation. When not needed, the toilet and shower are concealed behind the privacy doors - leaving you more storage and aisle room. These same doors can also be used to create separate sleeping quarters at night. Our 210 and Sprinter based models offer a permanently enclosed bathroom with a toilet, vanity sink, and sit-down or stand-up shower all separate from the galley. Inexpensive doors provide extra room in the bathroom while leaving the aisle clear for use. All centrally located, our bathrooms are accessible from either sleeping compartment (front or rear). Now it’s private and convenient!

Pack Up & Pack It In!

There’s no shortage of storage in a Roadtrek - up to 81 cubic feet in one model! - so you never have to leave those important extras behind. This is achieved in part by placing most of the water tanks below the floor. On some models there are also caserealous exterior storage compartments creating more interior living space. Instead of a conventional roof top air conditioner, all Chevy based Roadtreks are equipped with a ‘Domestic’ heat pump (air conditioner and heater) built into the roof allowing you to park in many RV restricted areas. Ducts ensure comfort all around.

The refrigerator vent is disguised and integrated into a black louvered grill in the galley window. The fresh water fill is securely located inside a door to prevent tampering. There’s also the macerator sewage pump, overfold dining table, temporarily enclosed bathroom/privacy area, stand-up aisle shower, lowered floor, built-in heat pump, exterior storage compartments below the floor, under-floor tanks, dual layer foam beds... and we’re constantly innovating more!

Our three section floor plan provides many advantages over other designs: forward facing seating for up to 7, private sleeping sections; aisle maintained when beds are set up; all beds at floor level; easy access to central bathroom/privacy area; up to 32” wide aisle where 2 can pass with ease; separate eating/sleeping sections for 2; possible permanent sleeping area at rear; and choice of front or rear seating areas.

The counter top is made with solid surfaces (so moderate scratches can be repaired). It offers ample clearance above, an under mounted sink with single lever faucet and flush cover/cutting board, and a recessed stove with flush cover. Beautifully crafted maple cabinetry with solid maple doors creates a brighter and modern looking interior. The 190 model on the front cover features the SS package: Cadillac “Sterling Silver” GM factory paint, black-out paint between the windows, grey lower body paint, and silver accent dress trim. Compliment it with optional aluminum wheels, and bumper covers.

For more storage on vacations, remove the seat behind the driver and install our removable wardrobe. Just as easily, remove the wardrobe, return the lounge seat, and you have another front seat again.

By swiveling both captains’ seats, the cab is also a living area for eating, entertaining or just relaxing. Our corner table with extendable leaves combines the large surface area of a kitchen table with compact conveniences of a smaller table.

sleeping quarters at night. Our 210 and Sprinter based models offer a permanently enclosed bathroom with a toilet, vanity sink, and sit-down or stand-up shower all separate from the galley. Expansive doors provide extra room in the bathroom while leaving the aisle clear for use. All centrally located, our bathrooms are accessible from either sleeping compartment (front or rear). Now that’s private and convenient!

Unique... Innovative... Exceptional!

Roadtreks are a testament to original thinking - there are 15 Canadian and American patents to prove it!

The top is mounted outside for easy service access and external water drainage.

And it’s mounted outside for easy service access and external water drainage.

The fresh water fill is securely located inside a door to prevent tampering. There’s also the macerator sewage pump, overfold dining table, temporarily enclosed bathroom/privacy area, stand-up aisle shower, lowered floor, built-in heat pump, exterior storage compartments below the floor, under-floor tanks, dual layer foam beds... and we’re constantly innovating more!

The counter top is made with solid surfaces (so moderate scratches can be repaired). It offers ample clearance above, an under mounted sink with single lever faucet and flush cover/cutting board, and a recessed stove with flush cover. Beautifully crafted maple cabinetry with solid maple doors creates a brighter and modern looking interior.
Roadtreks are nimble, responsive and a real pleasure to drive whether it's cruising down the highway, roaming back roads, maneuvering through congested traffic, or sliding into a campsite or parking space.

Enjoy outstanding handling for more pleasurable driving and greater safety. In addition to the excellent suspension, steering and braking capabilities of the chassis, Roadtreks have the laws of physics on their side. They have a much lower center of gravity than their taller cousins. Water tanks are located close to the axles for better weight distribution. With a much longer wheelbase (compared to the overall length) a Roadtrek provides unsurpassed highway stability. (A Roadtrek 190's length is only 50% longer than its wheelbase compared to 91% for a 22' B+ motorhome with a 138" wheelbase.) Chevrolet's body-on-frame construction, a short rear overhang, "normal" and "towing" transmission modes, and an optional locking differential with external transmission cooler (not on 170 and Sprinter) provide superior towing performance.

With Roadtrek's small size, parking is a breeze. Slide into a regular sized spot near your destination instead of searching for multiple spaces on the outskirts of the lot – or the outskirts of town. Enjoy ... to keep clear! Since Chevy based Roadtreks don't look like motorhomes, you can often avoid RV parking restrictions.

A Roadtrek is more than just a family camper. With up to 7 forward facing seats with seatbelts, it makes a great second vehicle. The cost of owning and operating a Roadtrek is far lower than a second vehicle in the driveway AND a motorhome in storage! Consider their higher resale value (compared to other motorhomes) and lower depreciation rate than a car, and you’ve got an unrivaled value.

More GO for your DOUGH!

Roadtreks offer exceptional fuel economy thanks to their aerodynamic shape and lower overall size and weight. They really show up their bulkier class A, C and B+ cousins, as well as higher roof class B’s.

The lowered floor on Chevy models allows a low, sweeping roof. The heat pump (air conditioner & heater) is built into the rear, with only the flush-mounted grills visible from the rear.

Broaden Your Adentures with Four-Wheel-Drive (in U.S. only)

Want to get away from the crowds, escape to areas off the beaten path? A remote campsite? Sunset on the beach. The hunting lodge. Tight mountain roads. Or just need the added traction and all-weather safety of 4WD for snow, sand or towing? Snow covered mountain passes. Fishing on the beach. Towing a toy hauler to go four wheeling in the desert. Pulling the boat up that algae covered ramp.

190 models (in U.S. only) can be equipped with a Torsion Bar Independent Front Suspension 4WD system provided by Quigley Motor Co. based on the same system used on GM’s pick-ups and full-size SUVs. Quigley has converted over 10,000 full-size GM and Ford vans to 4WD since the early 1970s. The system, which allows the front wheels to move up and down separately, provides the benefits of a minimal increase in vehicle height (1” front, 1 1/2” rear), improved road manners, better ride and handling, lower center of gravity, and no increase in turning radius. (A Roadtrek equipped with a 4WD system is intended for poor traction situations and moderate off-road use. It is NOT intended for extremely uneven terrain or serious off-road use.)

It’s ALL For YOU!

The look will grab you, the comfort will seduce you, just one drive will convince you - how enjoyable, effortless and economical the Roadtrek experience truly is!
The optional rear electric power sofa easily converts to a king-size or twin-like beds (shown) and can be reclined at the touch of a button to various positions for lounging. It provides comfortable belted seating for a total of 7 (6 in Canada). There’s room for a 4th (without belts) on the seat beside the galley for use when parked.

The RS-Adventurous combines legendary Mercedes-Benz engineering with the ingenious RV design creativity you’ve come to expect from Roadtrek. The Sprinter van is designed and built by Mercedes for unsurpassed fuel economy, durability, safety, practicality, comfort and quality. Powered by a fuel efficient CDI turbo diesel engine, you’ll enjoy awesome fuel economy, long service intervals and great longevity. The Electronic Stability Program (ESP) uses numerous sensors to determine when the vehicle is starting to lose control and uses the traction control and anti-lock braking systems to regain control. Traction control also improves traction on slippery surfaces. Rack and pinion steering and a smooth shifting five-speed automatic transmission enhance driving pleasure. The space efficient engine bay and cab architecture maximize usable interior length. The almost vertical exterior side panels maximize interior space within an overall exterior width comparable to other full-size vans. The cab is equipped with factory “comfort seats”. On long trips, you’ll appreciate the 10-way adjustability, lumbar supports and headrests. And Mercedes-Benz quality. Need we say more?

Inside you’ll find Roadtrek’s timeless space utilization with a few new twists. The second row seating consists of lounge seats designed for improved comfort (but do not convert to beds) or optional captain’s seats for even greater comfort on or off the road. All four captain’s seats swivel for optimal dining, game playing or just shootin’ the breeze. The second row will even invert towards the rear to give everyone a great view of the TV. Comfortable front sleeping is attained with our new optional folding mattresses. Stored during the day, they rest on top of the front four seats to provide longer, flat and even sleeping surfaces. When you don’t need them, just leave them at home.

With no gables or cabinets at either end of the galley, it’s open from front to rear on the driver’s side. Panoramic windows from front to rear provide daylight and openness unrivaled in any other class B. To maximize already generous storage space, a hanging pantry can be added to the rear end of the galley. The permanent bathroom’s unique doors maximize aisle width when the bathroom’s not in use. Yet when in use there’s ample space inside while keeping the aisle clear. Inside you’ll find a toilet, vanity sink and a sit-down or stand-up shower.

The ability to dine at the front lets you leave the rear beds made up for sleeping full time. People can wake up and retire at different times, plus you don’t have to set up a dinette or sofa to eat every morning, or make up a bed every night. With no gables or cabinets at either end of the galley, it’s open from front to rear.

German Automotive Excellence meets North American RV Ingenuity!

Styling... looks much better than competition.
Storage... takes everything we had in 28’ trailer.
Reputation... friends have one. Our first trip... no packing!... we fit!... others turned away.
Constantly get stopped by strangers asking to look inside my Roadtrek - happily comply.

A Scott, Scotts Valley, California

Dan O’Connell, Ohio

I would like to tell you how very happy I am with all the folks at H&P that I have dealt with. In over 30 years of RVing, and four motorhomes, I was never so well treated. Thank you for the caliber people you have.

ROADTREK

7
With two captain seats at the front and a power sofa at the rear, the SS-Agile makes a great passenger vehicle for five. Add an expansive galley and many other features and you’ve got a nice motorhome for two. With no gables or cabinets at either end of the galley, it’s open from front to rear.

The standard rear electric power sofa provides comfortable belted seating for 3 extra passengers for a total of 5. There’s room for a 4th (without belts) on the seat beside the galley for use when parked. At the touch of a button the sofa can be reclined to many positions for lounging or all the way flat for a king-size or twin-like beds. Ample storage below is accessible through the rear doors.

Opposite the galley and aft of the entry behind the front passenger seat is a permanent bathroom. Its unique doors allow ample aisle width when the bathroom is not in use. But when in use the doors allow extra space inside while keeping the aisle clear. Inside the bathroom you’ll find a marine toilet, vanity sink that slides out over the toilet, and a sit-down shower (or stand-up for smaller people).

Like other models, the rear sofa easily converts to a long-size or twin-like bed (we say “twin-like” since they are separated beside your legs only when you’re sleeping). The driver side is 6’ 4” long, the passenger side 5’ 10” long.

Compact exterior size … great fuel economy … comfortable seating for five … interior openness and livability … and all the features of a typical motorhome. The new SS-Agile provides an unrivaled combination of use-every-day driving and parking ease with the conveniences of a fully-equipped motorhome. Its possible uses are endless! Add the proven popularity of the Mercedes-built Sprinter and you’ve got another sure winner from Roadtrek!

A Drive-Everyday Motorhome on the Mercedes-built “Short” Sprinter

The New Roadtrek SS-Agile is based on the 140” wheelbase Sprinter 2500 van. At only 19' ½ feet long, the SS (“Short Sprinter”) is perfect for those who want a vehicle that’s really as easy to use everyday as a full-size conversion van or SUV but offers all the conveniences of a fully-equipped motorhome – and gets up to 25 MPG!

The 140” wheelbase Sprinter van has the same specifications as the 158” wheelbase van used for our RS (“Regular Sprinter”) model except the body and interior length are 38” shorter, overall length is 19’ 4” (including standard Continental spare tire kit) and turning radius is 6’’ curb to curb (compared to 5’’ for RS).

Inside you’ll find a great passenger vehicle for five within a fully-equipped class B that sleeps two. There is comfortable forward facing seating for five in the two front captain seats and rear electric power sofa. Just aft of the driver seat is a 19’ long galley with eye-catching solid surface counter, recessed European-style propane stove with glass cover, under-mounted stainless steel sink, 3.8 cu. ft. 3-way refrigerator, optional coffee maker and convection/microwave oven.

With two captain seats at the front and a power sofa at the rear, the SS-Agile makes a great passenger vehicle for five. Add an expansive galley and many other features and you’ve got a nice motorhome for two. With no gables or cabinets at either end of the galley, it’s open from front to rear.

Our 210 models represent the ultimate fusion of design, engineering and functionality in the class B segment. Built on the Chevrolet Express extended van, they are true class B motorhomes.

We start with a full van body and then extend the frame 18” behind the rear wheels increasing the overall length to 21’ 11”. Then we add a fully-painted steel cage-reinforced fiberglass body. After the cab, the body widens gradually to a maximum of 9” at the rear wheels then tapers to the rear. The 155” long wheelbase allows for amazing ride quality and handling without having to use dual rear wheels. We’ve retained the original van side entry door and rear doors for easier loading, better air circulation, single door key and power locks.

Inside there’s more of everything: more headroom (7’6”), more interior space, more room in the permanently enclosed bathroom, more storage space, more sleeping area, a larger refrigerator (raised in the 210-Popular for easier access), a large connection/microwave oven (microwave only in 210-Versatile) and an optional built-in coffee maker. The exterior features four hidden drawers for easy access to auxiliary batteries, external connections and storage.

The 210-Popular is the perfect model for those who want the ultimate in sleeping comfort for just two (or three) people with seating for up to five. With forward facing seating for three and sleeping for one at the front, the rear features a dinette or optional power sofa with seating for two that converts to a luxurious king-size bed or convenient twins.

If you want the option to take friends or family along, or want room to entertain others you meet along the way, the 210-Versatile is perfect. Two captain’s seats and two forward facing lounge seats provide comfortable, belted seating for four up front. Simply novel the captain’s seats and with the cloverleaf dining table you have the best seats in the house for whatever is on the menu - dinner, conversation or games. The power sofa at the back does triple duty. It makes a great place to watch a movie with the home theatre system and optional flat screen TV, provides belted seating for another two and makes into an 80” x 60” queen-size bed. It’s perfect for those who want a larger bed than the 190-Versatile but don’t want to lose seating for four at the front.

So when you ask yourself “Where do I want to go today?”, know that the 210 has it all and then some.

The 210-Popular’s expanded galley has a larger window and a longer and deeper solid-surface counter. A convection/microwave oven and 5 cu.ft. refrigerator are located after the galley to create more space for a handy pull-out table, four deep drawers and a huge cupboard below the counter. The twin beds are wider (30”) and the king bed is wider as well (8’8”).

While the 210-Versatile follows the same general layout as our 190-Versatile model, increased headroom and a wider aisle are immediately noticeable. The power sofa converts to a luxurious queen-size bed (80” x 60”) for a great night’s sleep.
The ability to dine at the front lets you leave the rear beds made up for sleeping full time. People can wake up and retire at different times, plus you don’t have to set up a dinette or sofa to eat every morning, or make up a bed every night.

The 190-Popular offers the flexibility of separate twin beds (shown) or an enormous king-size bed (up to 6’4” x 6’1”). The optional premium brand flat screen TV allows you to watch TV in bed or swing it into the aisle to watch in comfort from the front captain’s seats.

I want to express my sincere appreciation to your company, for providing proof that you are, in reality customer committed. It is obviously not merely a slogan.

I look forward to many carefree miles of travel in my Roadtrek which performed flawlessly on my 1300 mile trip from Florida to Pennsylvania.

Dr. Edmund O’Neill, Wilkes-Barre, Pennsylvania

Do you want an ideal way to leave the rest of the world behind without sacrificing creature comforts or driving and parking convenience?

Based on the great handling Chevrolet Express 3500 extended van, the 190 models set the mood whether you’re lazing down endless backcountry roads, or searching for that restaurant the locals have been raving about.

When it’s missing for just the two of you, the 190-Popular really comes into its own. You’ll be cheerful and rested in the front captain’s seats when you watch dusk silhouette the road ahead, and you’re seeking that perfect spot to spend the night. When it’s time to turn in, the rear dinette converts to a sumptuous king-size bed (6’4” long on one side) or into two comfy twin beds (6’4” x 3’10” long) with a night table between. If you prefer, instead of the night table, you can get two more forward facing seatbelts at the rear. Round these features off with a full-length wardrobe, loads of storage, a front dining table and a well-equipped galley - just pack up and you can hit the road for weeks. Now that’s romance!

The 190-Versatile is the perfect companion for daily errands, vacations or weekend adventures! Whether it’s the whole family or just the two of you, enjoy the world in comfort and style.

Check this out! Two captain’s seats and two forward facing lounge seats make up seating for four as you navigate your way down winding trails. At night, tuck into three beds that provide sleeping for up to four (requires optional folding mattresses at front). The U-shaped lounge with behind seating for two turns into a large double bed. The privacy doors let you watch some TV or curl up with a book without disturbing the sleepers up front.

With the 190-Versatile, the secret is in its name. It is truly “Versatile”. Whether “roughing it” at a campground or soaking up the rays at the beach, traveling takes on new meaning when you have all the comforts and conveniences of home within an economical and easy to drive van.

When you’re not off blazing new trails, the 190-Versatile is the perfect second family vehicle. Remember - convenient forward facing seating for up to six. How better to take on the challenges of everyday living? The 190-Versatile, your answer to the call of the road!

The 190-Popular offers the flexibility of separate twin beds (shown) or an enormous king-size bed (up to 6’4” x 6’1”). The optional premium brand flat screen TV allows you to watch TV in bed or swing it into the aisle to watch in comfort from the front captain’s seats.

Available in 4-wheel drive!
Being a lone traveling woman of 80 years of age, I wanted you to know what real pleasure this van has given me. I am the owner and sole driver of this vehicle and I now have over 88,000 miles on it. It is still my greatest pleasure and I plan many more miles to come.

Lorraine L Caffey

Roadtrek’s most compelling alternative to SUVs and conversion vans is here!

The 170-Popular on the grand handling Chevrolet Express 2500 regular van is the easiest of all Roadtreks to maneuver through traffic and fit into those car sized parking spots. The 170 has many features you take for granted in a car, like better fuel economy than most camper vans (never mind larger motorhomes), along with the full-size motorhome features you would expect from any Roadtrek.

The 170-Popular seats five and sleeps three with ease (optional folding mattress required at front). The rear L-shaped lounge converts easily to a 6’2” double bed that is both spacious and comfortable. With “across the rear” storage below the bed, you have all kinds of room for the things you want to bring along. The front Cloverleaf dining table stores neatly out of the way, creating even more room to stretch out and relax.

Add an optional flat screen TV and DVD player and you have an entertainment system that takes up very little room while providing you with something to do on a rainy day. The TV rotates into the aisle so you can watch it from the front captain’s seats – the most comfortable seats in the house.

Whether you’re on your way to the soccer game with the kids and need a change room, or heading out of town for a weekend getaway, you will appreciate the driveability, parking ease and efficiency of the 170. It’s the perfect second vehicle that combines convenience, comfort and value all in one affordable package.

Roadtrek’s most compelling alternative to SUVs and conversion vans is here!

With three seats at the front and an L-shaped lounge at the rear, the 170-Popular makes a great passenger vehicle for five. Add a fully-equipped galley and many other features and you’ve got a nice motorhome for two or three.

We covered a total of 7000 miles in 20 days and thoroughly enjoyed every mile. The Roadtrek performed admirably throughout the trip, and at no time did we wish we were traveling in any other type of RV. We are convinced that for 2 or 3 people the Roadtrek 170 is the perfect vehicle, combining all the best features of a large camping rig with the economy and maneuverability of a car.

Camping in the Roadtrek was simple and convenient. No need to struggle with, and so easy to park and level. The primitive campers were the simplest of all. Just pull in and the fully self-contained unit is all set. The bed was far better than we had dared hope for in a camping unit. My wife and I highly recommend the Roadtrek 170 as a money saving combinational camping rig/second car option to anyone interested in part-time excursions into the great outdoors. Thank you all for building such a fine and attractive motorhome as the Roadtrek 170. Keep up the good work and HAPPY TREKKING to all.

James & Julie Mager, Ishpeming, Michigan

SE and LX Packages

The 190 with SE package on page 12 includes custom ordered Cadillac “Sterling Silver” GM factory paint, grey paint on the lower body, black-out sections between the windows (170 and 190 only) and silver accent dash trim. The same package is available on all other models with some variations.

The UX package, pictured on the 210 on page 5, features “Sandstone” GM paint and charcoal paint on the lower body. It’s also available on other Chevy based models.

If you like the image and styling of a full-size SUV or luxury conversion van, these packages will appeal to your sense of style. These models have head turning good looks to go along with the comfort and convenience that all Roadtreks offer.

A Commitment to Safety

We are so serious about manufacturing the safest class B motorhome that we hire independent engineering firms to test our vehicles. The results follow.

TESTING RELATED TO FUEL SYSTEM MODIFICATION TO ACCOMMODATE LOWERED FLOOR

When GM completely redesigned the Chevrolet van in 1996, they relocated the fuel tank on all van (and some van cab and chassis) models from behind the rear axle to between the axles (mid-ship). To enjoy the benefits of a lowered floor (improved fuel economy, handling, appearance, overall height, galley counter height and ease of entry and exit), we simply lowered the original tank by 1 1/2”. The tank’s clearance is still higher than the running boards, which have proved sufficient for years.

You won’t enjoy the “off road” clearance of a truck, but you’ll be fine if you don’t drive anywhere you wouldn’t drive a car.

To modify the fuel systems, GM requires that we meet or exceed very stringent safety and engineering standards. This mandatory testing includes:

Fuel System Integrity Crash Testing (Federal Motor Vehicle Safety Standard 301)
The purpose of this series of tests is to reduce deaths and injuries occurring from fires resulting from fuel spillage during and after crashes. The testing consists of 5 impacts: frontal, side, rear, and front-to-side collisions. The test vehicle was stationary and impacted by a moving barrier at 50 mph (80 km/h) and 30 mph (48 km/h), respectively. The test vehicle did not leak any fuel.

Exhaust Emission Testing (California Air Resources Board)
Today’s vehicles require increasingly stringent pollution control equipment. Exhaust emission testing was successfully conducted on Chevy based Roadtreks to ensure that emissions did not exceed limitations.

Fuel System Evaporative Emission Testing (CARB)
In addition to controlling exhaust emissions, evaporation of fuel is a source of pollution that must be strictly limited. The fuel system (tank, fuel lines, etc.) cannot leak more than the equivalent of a pinhole. Testing verified that Chevy based Roadtreks met this requirement.

Second Generation On Board Diagnostics (OBDD) Verification (CARB, Vehicle Code: Sec. 27156)
Today’s vehicles are equipped with sensors and actuators that sense the operation of various components and actuate others to maintain optimal performance on board computers. GM is capable of monitoring all of the sensors and actuators to determine whether they are working as intended. Included are those that detect fuel evaporation, as described above. It was verified that the OBDD system is functioning properly on all Chevy-based Roadtreks.

OTHER MANDATORY TESTS

New Occupant Head Protection Testing (FMVSS 201U)
The purpose of this complex new series of tests is to provide occupants with additional head protection to interior pillars, side rails, headers and roofs during crashes. This testing confirms adequate impact absorbing design and special materials are used in the subject areas to reduce head injuries. Successful testing involves launching a test “head” at numerous target points to the vehicle’s interior without exceeding limited thresholds of “injury” to the “head”. Targeting, launching and recording of the impact forces are controlled by a computerized system. All Chevy based Roadtreks have passed these very stringent tests. Some other RV manufacturers still cannot make this claim.

Seat Belt Testing (FMVSS 210)
The purpose of this testing is to reduce deaths and injuries to motor vehicle occupants during crashes. It confirms proper seat belt location for effective occupant restraint, and minimizes the possibility of seat belt anchorage failures. Successful testing requires the application of a 3000-pound force in a forward direction to the seat belts for 10 seconds without failure. Testing confirmed that all Roadtrek seat belts meet these requirements.

Seating System Testing (FMVSS 207)
The purpose of this series of tests is to reduce deaths and injuries to motor vehicle occupants during crashes. This testing minimizes the possibility of failure of the seats and their attachments as well as installation problems. Successful testing requires the application of significant forces in various directions to the seats and their attachments without failure. All Roadtrek seating has been tested to ensure it meets or exceeds these requirements.

Flammability Testing (FMVSS 302)
The purpose of this testing is to reduce deaths and injuries to motor vehicle occupants caused by fires, especially those originating from the vehicle’s interior from sources such as matches or cigarettes. Testing confirms that the burn rate of all interior materials does not exceed specified maximums. All applicable materials used in Roadtrek interior meet or exceed the specified burn resistance requirements.

VOLUNTARY TESTING

There are numerous safety standards that apply to lighter vehicles, such as passenger cars, but not to heavier vehicles, such as class B motorhomes. They do not apply for various reasons, such as the inherent safety advantage of heavier vehicles, or that it does not make sense on such vehicles. In order to “raise the bar” on the safety of Roadtreks, we have voluntarily conducted numerous tests that are not required by law, nor done by most of our competitors.

Dynamic Rollover Testing (part of FMVSS 208)
The purpose of this testing is to reduce deaths and injuries to occupants and their appendages not remaining inside the passenger compartment during rollover accidents. The test is conducted by placing the test vehicle on a movable platform perpendicular to the platform’s line of travel. To help start the rollover, the test vehicle tests at a 24 degree lateral incline with the tires against a “trip” flange. The platform is propelled down a test track to 30 mph (48 km/h) and stopped in such a way that the vehicle is propelled off the platform.

Seating system testing minimizes the possibility of failure of the seats, their attachments and their installation.

For frontal impact testing, the test vehicle impacted a fixed barrier at 50 mph (80 km/h). The entire fuel system was then inspected for leakage. Our test vehicle did not leak any fuel.

For frontal impact testing, the test vehicle impacted a fixed barrier at 50 mph (80 km/h). Again our test vehicle did not leak any fuel.

Second Generation On Board Diagnostics (OBDD) Verification (CARB, Vehicle Code: Sec. 27156)
Today’s vehicles are equipped with sensors and actuators that sense the operation of various components and actuate others to maintain optimal performance on board computers. GM is capable of monitoring all of the sensors and actuators to determine whether they are working as intended. Included are those that detect fuel evaporation, as described above. It was verified that the OBDD system is functioning properly on all Chevy-based Roadtreks.

Other Mandatory Tests

New Occupant Head Protection Testing (FMVSS 201U)
The purpose of this complex new series of tests is to provide occupants with additional head protection to interior pillars, side rails, headers and roofs during crashes. This testing confirms adequate impact absorbing design and special materials are used in the subject areas to reduce head injuries. Successful testing involves launching a test “head” at numerous target points to the vehicle’s interior without exceeding limited thresholds of “injury” to the “head”. Targeting, launching and recording of the impact forces are controlled by a computerized system. All Chevy based Roadtreks have passed these very stringent tests. Some other RV manufacturers still cannot make this claim.

Seat Belt Testing (FMVSS 210)
The purpose of this testing is to reduce deaths and injuries to motor vehicle occupants during crashes. It confirms proper seat belt location for effective occupant restraint, and minimizes the possibility of seat belt anchorage failures. Successful testing requires the application of a 3000-pound force in a forward direction to the seat belts for 10 seconds without failure. Testing confirmed that all Roadtrek seat belts meet these requirements.

Seating System Testing (FMVSS 207)
The purpose of this series of tests is to reduce deaths and injuries to motor vehicle occupants during crashes. This testing minimizes the possibility of failure of the seats and their attachments as well as installation problems. Successful testing requires the application of significant forces in various directions to the seats and their attachments without failure. All Roadtrek seating has been tested to ensure it meets or exceeds these requirements.

Flammability Testing (FMVSS 302)
The purpose of this testing is to reduce deaths and injuries to motor vehicle occupants caused by fires, especially those originating from the vehicle’s interior from sources such as matches or cigarettes. Testing confirms that the burn rate of all interior materials does not exceed specified maximums. All applicable materials used in Roadtrek interior meet or exceed the specified burn resistance requirements.

VOLUNTARY TESTING

There are numerous safety standards that apply to lighter vehicles, such as passenger cars, but not to heavier vehicles, such as class B motorhomes. They do not apply for various reasons, such as the inherent safety advantage of heavier vehicles, or that it does not make sense on such vehicles. In order to “raise the bar” on the safety of Roadtreks, we have voluntarily conducted numerous tests that are not required by law, nor done by most of our competitors.

Dynamic Rollover Testing (part of FMVSS 208)
The purpose of this testing is to reduce deaths and injuries to occupants and their appendages not remaining inside the passenger compartment during rollover accidents. The test is conducted by placing the test vehicle on a movable platform perpendicular to the platform’s line of travel. To help start the rollover, the test vehicle tests at a 24 degree lateral incline with the tires against a “trip” flange. The platform is propelled down a test track to 30 mph (48 km/h) and stopped in such a way that the vehicle is propelled off the platform.
Although the platform speed and height of the trip flange were increased above the requirement, the Roadtrek would not rollover. This is considered a pass (in a rollover situation, what safer vehicle to be in than one that does not rollover?).

**Roof Crush Resistance Testing (FMVSS 216)**

This testing is intended to reduce deaths and injuries due to crushing of the roof into the passenger compartment during rollover accidents. The center of the roof at the top of the “A” pillar (between the windshield and front door windows) cannot crush more than 5” (125 mm) when applying a force equal to 1.5 times the vehicle’s unladen vehicle weight. This testing was conducted at the top of the “A” pillar and also at the top of the outer roof window. The Roadtrek successfully passed both of these tests.

**Comparative Side Crush Resistance Testing** *(part of FMVSS 214)*

During the manufacture of conversion vans (4 captain seats, rear sofa/bed, and with or without a raised roof, not to be confused with class B motorhomes), some of the original vertical reinforcements or “studs” are removed from the original “cargo” van body to allow the installation of side windows. Although this meets with applicable safety standards, we wanted to compare the strength of the original cargo van with no studs removed, to Roadtreks which have some studs replaced with cabinetry secured to the chassis (although wood is not as strong as steel under equal conditions, the original steel studs are of minimal thickness and depth, whereas our cabinetry is much more substantial).

This testing is intended to simulate the vehicle impacting a utility pole at a perpendicular angle. It measures the force necessary to crush into the side of the vehicle by 7”. The original cargo van required 9,700 pounds of force to achieve 7” of crush, whereas the Roadtrek required 12,100 pounds!

**SAFETY FIRST - always!**

Your safety is our priority! No other manufacturer of class B motorhomes invests so much time, effort and money to ensure the product we offer you is as safe as can be. When shopping for your next motorhome, select the one that has been proven safe… the Roadtrek.

I had an accident with my Roadtrek. The reason I’m telling you about my unfortunate mishap is to applaud the [crash test] report in the last pages of the Roadtrek sales brochure… I am very happy you made my Roadtrek as strong as you did. It not only drives like a van, it “Protects Like a Tank”! Why would anyone buy any other class B motorhome?  
Reed E Cox, Pace, Florida

“Automotive Manufacturer Style” Durability Testing

Durability is more an issue of customer satisfaction and value, but improved reliability can result in increased safety (less breakdowns, etc.).

Automotive manufacturers conduct extensive durability testing where they put the equivalent of 80,000 to 120,000 miles (130,000 to 190,000 km.) of wear on a vehicle in a short period of time as part of the design and development process. By having durability testing conducted for us, numerous design improvements - which would only have become apparent during the normal life of the first Roadtreks built and sold - were quickly identified and implemented. We are not aware of any other RV manufacturers that conduct the same tests on its products (probably due to the costs involved).

**“Automotive manufacturer” style durability testing allowed us to quickly identify and implement numerous design improvements which would otherwise only become apparent during the normal life of the first vehicles built and sold.**

---

**Optional Continental kit looks great and provides more interior storage. It’s mounted on the receiver to avoid stress and rust on the door and off-centre to the trailer hitch to allow towing and access to one door. To access the other door, simply remove the hinge pin to lower the spare tire. To access the tire, just unclasp the tire cover.**

---

**A large capacity auxiliary lead acid battery is totally concealed yet easily accessible on slide-out tray. A second auxiliary battery is optional on all models except the 170.**

---

**A large capacity auxiliary lead acid battery is totally concealed yet easily accessible on slide-out tray. A second auxiliary battery is optional on all models except the 170.**

---

**There is a separate compartment for an exterior shower and city water connection with quick disconnect. The 210 and SS feature a detachable power cord for trips away from the campsite.**

---

**External propane barbecue connection with quick disconnect.**

---

**The macerator sewage pump chops up any solids and tissue and ejects the entire contents through a convenient 1 1/4” hose. No mess, no fuss.**

---

**There is a separate compartment for an exterior shower and city water connection with quick disconnect. The 210 and SS feature a detachable power cord for trips away from the campsite.**
The RS's permanent bathroom's unique doors maximize aisle width when the bathroom's not in use. Yet when in use there's ample space inside while keeping the aisle clear. Inside there's a toilet, vanity sink above, mirror, 110V receptacle, and a sit-down or stand-up shower.

To increase versatility, we've added a second fresh water tank inside 190 and 210 models. By using anti-freeze in the black and grey water tanks, the water system can be used in moderate sub-freezing conditions.

The 210’s permanent bathroom features complete privacy, toilet, vanity sink with storage cabinet, mirror and 110V receptacle. The shower can be used as a sit-down shower with the door closed or used in the aisle as a stand-up shower.

Any Roadtrek except the SS can be equipped with our optional full-height armoire. It replaces the passenger side lounge seat and offers extra hanging or shelf space on numerous adjustable shelves and drawers.

Chevy based Roadtreks come equipped with 5 spoke chrome look wheel covers.

Dress up your Roadtrek with optional sporty aluminum wheels for Chevy or Sprinter based models.

A removable cover in Chevy based Roadtreks reveals a trough with a drain that spans the lowered floor and prevents water from leaving the shower area.

For added convenience, there's a sink liner in the galleysink for personal hygiene. When finished, remove the liner, leaving your galley sink clean and untouched for food preparation.

Chevy based Roadtreks come equipped with 5 spoke chrome look wheel covers.

Dress up your Roadtrek with optional sporty aluminum wheels for Chevy or Sprinter based models.
Our Commitment to You

The Roadtrek is the result of one man’s determination to get exactly what he wanted in an RV.

Having no interest in being a “weekend bus driver,” Mr. Jac Hanemaayer of Kitchener, Ontario, knew a large class A or C motorhome was not for him. Yet he was not about to trade the comfort and amenities they offered for the convenience and mobility of a van. Unable to find the best of both worlds in the marketplace, he did what came naturally to him. In 1974, he designed a vehicle for himself and had it built by a fledgling local camper van manufacturer, Home & Park Vehicles Ltd. He was so pleased with the result that he bought the company.

Being a true innovator, Mr. Hanemaayer was never content. In 1980, he completely redesigns the vehicle, incorporating his own famous sweeping, wide-open floor plan, long section floor plan. The Roadtrek Motorhome Van was born.

With a commitment to continually refining its vehicles so they are one step ahead of the competition, Roadtrek has grown to become the best selling North American camper van since (1990).

I have always owned one type of RV or another over the past 30 years, from Class A to Class C. I consider the Roadtrek the best engineered, developed and constructed RV for its size of any I have ever owned or even seen on the market.

Gary & Jane Alden, Destin, Florida

I want to tell you that our Roadtrek has been our second home. It has been part of our way of life and has provided us with a continuing source of pleasure. We have had many trips all over North America and it has proven to be most valuable in every respect. I want to extend my compliments to Roadtrek Motorhomes for designing and maintaining the excellent position that you have achieved in the field of recreational vehicles. I wish you continued success in the years to come.

Doug Richardson, Bradford, Ontario

Thank you and your staff for inviting us to participate in Roadtrek’s 30th Anniversary celebrations. It was such an honor and a privilege to have been included in such a historic and prestigious event… even the heat could not dampen the spirits, the enthusiasm, and the gaiety of the event. It was first class all the way. Beginning with the invitations, to the catered meals, to the entertainment! We especially enjoyed the General Jackson Showboat Luncheon (the entertainment was fantastic) and the cruise on the Cumberland River which was delightful. The Grand Ole Opy was a first-time for us. It was very interesting and most impressive. Again thank you and best wishes to all of you for your continued success on a terrific motorhome.

Gino & Jack Huggins, Silver Lake, Ohio

“A Father’s Dream… A Son’s Reality

“Quality Trek” Story

Along with its truly innovative design, an unwavering commitment to quality and continuous improvement is the key to Roadtrek’s success over the years. In fact, Roadtrek was the first RV manufacturer in North America to obtain registration to the rigorous international standard ISO9001:2000(E). ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies. The ISO 9001:2000(E) standard is a complete Quality Management System Standard with an emphasis on effective processes and continuous improvement.

In addition, every Roadtrek meets and often exceeds rigid RVIA, CSA, UL, FMVSS, ECE, General Motors and DaimlerChrysler standards set for recreational vehicles. Each Roadtrek is also subjected to over 800 quality checks, inspections and tests. On top of all this, the employees are responsible for the quality of their own work. Every vehicle is individually built with care and attention to detail.

Backed with Pride

It is fitting that the ‘best built’ should be the ‘best backed’. To reflect the confidence we have in our vehicles, Roadtrek offers a 4 year or 48,000 mile or 80,000 km limited motorhome warranty. Along with its truly innovative design, an unwavering commitment to quality and continuous improvement is the key to Roadtrek’s success over the years. A Father’s Dream… A Son’s Reality

Despite growth in sales and expansion of markets, Roadtrek is still run by people who are passionate about their products and the people who buy them. Our staff has access to company demonstrators to use for their own vacations. This is an excellent way to get feedback for product improvements.

Founder Jac Hanemaayer still participates in the development of the vehicle he originated. His son Jeff started as a summer student employee and knows the product and industry inside out. In his previous position as President, Jeff oversees the company’s growth from 1985 to 2000. He continues to guide Roadtrek as Chairman while Roadtrek’s popularity soars to new heights.

To both Jac and Jeff, research and development still mean taking your product out and putting it through its paces. They both use their own Roadtreks avidly. They know that living with a Roadtrek helps to stimulate creativity in figuring out those special changes that make a good thing even better!

More than just a Sale

Jeff is committed to more than just selling and refining the excellent vehicles that are Roadtreks. The after-sales service, both from the factory and dealer network, is dedicated to making owning a Roadtrek a long-term positive experience.

Taking this Show on the Road

Jeff knows that customer service is more than just a 1-800 number. He believes in meeting face-to-face with the people who put their faith and hard-earned money into a Roadtrek. It’s not uncommon to see Jeff at RV shows and Roadtrek owner club rallies, personally leading discussions and answering questions. It’s his commitment to Roadtrek - and to you!

A lot of Happy Campers

Buying a Roadtrek means even more than becoming part of the ‘Roadtrek-ker’ family - it means a chance to join a North America-wide owner’s club - Roadtrek International. With the ongoing support and assistance of Roadtrek, the club became an active chapter (and the only camper van chapter) of the RVIA in February of 1993. By 2006, the membership of Roadtrek International exceeded 200 vehicles (over 4000 people) and is the fifth largest chapter of the RVIA. One of the advantages of membership is meeting new friends with common interests. Members take part in rallies, group outings, tours, and swaps where they exchange Roadtrek adventures and share ideas.

Still driving ahead

Roadtrek is the best selling camper van in North America but Jeff doesn’t intend to stop here. He has a winning formula – a state-of-the-art production facility, a superior dealer network, and his commitment to the ‘Roadtrek-ker’ family.

Following these principles, the ‘Fuel Efficient Motorhomes you’ll love to drive’ are still ahead of the competition, Roadtrek has grown to become the best selling North American camper van (since 1990). With a commitment to continually refining its vehicles so they are one step ahead of the competition, Roadtrek has grown to become the best selling North American camper van since (1990).

## 2007 AUTOMOTIVE FEATURES

### Front single bed width
- | 1660 mm/65" |
- | 1540 mm/61", 1660 mm/65" |
- | 1575 mm/62", 1660 mm/65" |
- | 1830 mm/72", 1930 mm/76" (opt.) |
- | not applicable |

### Front single bed length - left, right
- | 1260 mm/50" |
- | 1320 mm/52" |
- | 1520 mm/60" |
- | not applicable |
- | not applicable |

### Rear twin bed length - left, right
- | 1880 mm/74" |
- | 1880 mm/74" |
- | 2030 mm/80" |
- | not applicable |
- | not applicable |

### Rear double or queen bed width
- | 1260 mm/50" |
- | 1320 mm/52" |
- | 1520 mm/60" |
- | not applicable |
- | not applicable |

### Rear double or queen bed length
- | 1260 mm/50" |
- | 1320 mm/52" |
- | 1520 mm/60" |
- | not applicable |
- | not applicable |

### Rear king bed width
- | 1260 mm/50" |
- | 1320 mm/52" |
- | 1520 mm/60" |
- | not applicable |
- | not applicable |

### Standing height
- | 1880 mm/74" |
- | 1880 mm/74" |
- | 2030 mm/80" |
- | not applicable |
- | not applicable |

### Towing - tongue weight (6)
(6) A weight distributing hitch is required for tongue weights over 200 Kg/400 lbs.

### Towing - tow weight (5)
(5) Maximum towable weight with driver only. This weight reduced by weight of optional equipment, fuel, water, propane, cargo and/or passengers.

### Gross combined weight rating (4)
- | 6350 Kg/14000 lbs. |
- | 7258 Kg/16000 lbs. |
- | 7258 Kg/16000 lbs. |
- | 6146 Kg/13550 lbs. |
- | 6146 Kg/13550 lbs. |

### Height - overall
- | 3430 mm/135" |
- | 3940 mm/155" |
- | 3940 mm/155" |
- | 4010 mm/158" |
- | 3560 mm/140" |

### Length
- | 2540 mm/8' 4" |
- | 2590 mm/8' 6" |
- | 2590 mm/8' 6" |
- | 2870 mm/9' 5" (with roof A/C) |
- | 2870 mm/9' 5" (with roof A/C) |

### Door locks - with remote
- | 145 amp. |
- | 145 amp. |
- | 145 amp. |
- | 150 amp. |
- | 150 amp. |

### Defroster - rear window
- | 4 and 7 way |
- | 4 and 7 way |
- | 4 and 7 way |
- | 4 and 7 way |
- | 4 and 7 way |

### Cruise control
- | 454 Kg/1000 lbs. |
- | 454 Kg/1000 lbs. |
- | 454 Kg/1000 lbs. |
- | 227 Kg/500 lbs. |
- | 227 Kg/500 lbs. |

### Battery
- | Express 2500 Regular van |
- | Express 3500 Extended Van |
- | Express 3500 Extended Van |
- | Sprinter 2500 Van |
- | Sprinter 2500 Van |

### Alternator
- | 1660 mm/65" |

In case you were wondering before you go wandering...

We thought it might be helpful to summarize the top questions we have received over the years and give you the answers here:

Can I buy directly from the factory?
No. We sell through a dealer network to ensure excellent sales and service of our product. Arrangements can be made through your local dealer, however, to take delivery at our local Kitchener dealer (Canadian residents only), or one in New York state or Michigan (U.S. residents only).

Can a U.S. resident buy in Canada or a Canadian resident buy in the U.S.?
A U.S. resident needs a Roadtrek built to U.S. specifications. A Canadian resident needs a Roadtrek built to Canadian specifications. Units are built to unique specifications for each country.

Why do Roadtreks cost more than some B+ and class C motorhomes and low end class A’s? Why don’t they cost less, considering their smaller size?
Roadtreks are more expensive to build due to the higher costs of manufacturing the “exterior shell”, adapting to unusual shapes, and working with limited space.

Why is it more expensive to manufacture the “exterior shell” of a Roadtrek?
Many B+ and class C motorhomes consist of a van cab and chassis to which a flat floor, straight fiberglass walls and flat roof are added. All Roadtrek models start with a more expensive complete van body. The Roadtrek 210 has an aerodynamic molded fiberglass body added with the original side and rear cargo doors retained. Roadtrek 170 or 190 have the roof removed and replaced with a higher molded fiberglass roof. Also a section of the floor is removed and replaced with a custom lowered floor. Other additional modifications are also required, but these are the most time consuming.

How do “unusual shapes” and working within limited space increase the cost of a Roadtrek?
It is much easier to adapt interior cabinets and components to the square fiberglass “box” of a class A, C or B+ than to the unusual curved shape of the Roadtrek’s interior. In addition, it is more difficult to get all the equipment to fit comfortably within the limited space of a Roadtrek - and, when off-the-shelf items are not compatible, it’s often more expensive to get custom made or modified components such as water tanks and propane tanks.

Is there a higher roof class B less expensive to build than a low profile Roadtrek with a lowered floor?
Yes, a higher roof class B is less expensive to build because no modifications are required to modify the fuel system to lower the floor, and there is more space available to install the desired equipment and components.

There’s only the two of us. Why would we want 3 or 4 seats at the front?
Four seats provide a roomy area to eat, entertain or relax with another couple. More importantly, a 3rd seat and one of the captain’s seats provide an eating area at the front for the two of you that’s much easier to use than the two captain’s seats. Having separate eating and sleeping sections is a convenience normally found only in larger motorhomes. Not only can the two of you get up and retire at different times, but you need not convert the bed at the rear into a sofa or dinette to eat. Extra seating also increases openness at the front.

How do ‘unusual shapes’ and working within limited space increase the cost of a Roadtrek?
Why don’t you build your lounge seats on steel frames instead of wooden boxes?
Steel framed seats that convert to beds have limited space for storage and equipment. The seat belts of our lounge seats are mounted on the chassis. The wooden seat bases have been tested and pass all mandatory safety tests (consider how many people have survived collapsed buildings by hiding under a wooden desk - don’t underestimate the strength of a wooden “box”).

Can I buy directly from the factory?
No. We sell through a dealer network to ensure excellent sales and service of our product. Arrangements can be made through your local dealer, however, to take delivery at our local Kitchener dealer (Canadian residents only), or one in New York state or Michigan (U.S. residents only).

Can a U.S. resident buy in Canada or a Canadian resident buy in the U.S.?
A U.S. resident needs a Roadtrek built to U.S. specifications. A Canadian resident needs a Roadtrek built to Canadian specifications. Units are built to unique specifications for each country.

LOCATION

How to find us

Everyone should go and visit the Roadtrek factory in Kitchener, Ontario. What a place. You can see why the Roadtrek is so well puttogether. The place is spotless and well organized. The people were very friendly and seemed very motivated and happy in their work. They spoke proudly of the jobs that they were doing. We went there on a whim but it turned out to be a great experience that we recommend to all.

Bobbie Bussolari, Suffield, Connecticut

Come visit our modern 120,000 sq. ft. plant. Tours are available Monday through Friday at 10:00 am or 2:00 p.m. Closed weekends, between Christmas and New Year, all Canadian holidays and for a two week summer shutdown. Space is limited, so please call ahead. Contact us at sales@roadtrek.com or 1-888-ROADTREK to make a reservation.
From its clever, compact and quality use of every inch of space to its sleek look, from the back roads of the Northwest to the busy streets of DC and the narrow lanes of New England, the Roadtrek accommodated our needs for comfort, charm, performance and economy. We love it!... RV shows led me to believe I needed more than 19 or 21 feet for fulltiming. We ended up with a larger motorhome for auible... Then... we down sized to the 19 foot Roadtrek. It has served us well for over a year now. We are able to travel easily with no tow vehicle. Our mileage is better, our insurance lower, and best of all, I can and do drive it. It takes us to beautiful places, to visit lots of wonderful family, and to the local supermarket...

Gael P. Mustapha, Green Valley, Arizona

On the road since 1974!
