Our Commitment to
**Quality
Strength
Durability**

"Where Quality is Everyone's Responsibility"

Absolute Northwood

One Piece Laminate Walls

Our aluminum wall frames are constructed of .060" thick aluminum tubing and all joints are welded full width, not spot welded like much of the competition.

One Piece Continuous Fiberglass

The outer skin of our laminated wall is a single sheet of tough, corona treated fiberglass. Corona treating ensures the polyurethane is able to properly accept the hot melt adhesives. A single piece of fiberglass eliminates seams that can leak & it's stronger too.

Steel Bonderizers

We add steel bonderizer strips inside the wall at all mounting points. The bonderizers provide a steel anchor point for any fixtures that are mounted to the walls.

Solid Core Anchor Blocking

We also add solid core anchor blocking in the frame perimeter. The solid blocking provides a substantial anchor medium for securing screw threads.

Solid Foundation: Thick Basement Walls & Aluminum Trusses. Extra Strong Thick Wall Tubular Aluminum Floor Frame

Really Big holding tanks require a 'Really Big' floor structure...
That's The Wolf Creek Floor Structure!
Thick wall aluminum basement floor joists support our holding tanks under the basement of every Wolf Creek Truck Camper.

Continuous One Piece Fiberglass Cabover / Bulkhead

No seams that can leak!

QUALITY FIRST

Solid Wood Face Frame Cabinetry that is secured to the wall and ceiling!

We build our own cabinets, and every cabinet is built to the best quality specifications. By building our own cabinets, we can guarantee that they will be made right and are built to last!

By integrating the cabinet with the structure of the ceiling and walls, our coaches and our cabinets are both made stronger.

Top Quality Materials

All NORTHWOOD cabinets are made with residential quality material and methods. Because we use screws, they hold up better under travel/road conditions.

Face Frame Construction

We use the same construction techniques used in quality residential cabinetry. We assemble hardwood styles with screws on a face frame machine to ensure strong, durable cabinets. The result: Beautiful, quality cabinetry and the best built truck camper!

Truck Camper Magazine Review

Spending two weeks in the 850 gave us an unusual opportunity to experience a new brand and product.

For starters, the Wolf Creek 850 is right up our alley; hard-side, non-slide, fully self contained, and brimming with practical and weight saving design choices. In short, we love campers like this because they are everything we need for the kind of long-distance, go-anywhere truck camping we enjoy. Even more important, they show a willingness of manufacturers to embrace the increasing importance of lower weight truck campers and design new campers accordingly.

We really appreciated the generous holding tanks for a camper this size. Thirty gallons of fresh water? That's amazing...The gray and black tanks were also ample at nineteen gallons and twenty gallons respectively... When we turned the vent fan on, it surprised us with just how much air it pulled...

... they put a very tall bubble window in the bathroom that allowed me, at 6'3", to see almost completely around the camper... it was really fun to be able to look around and see what was going on outside the camper...

We were mixed on our impressions of the dinette. We liked how big it was, but wondered if it needed to be quite this wide. Northwood explained that it was wide to allow for an adult-sized sleeping area. It certainly was. The dinette was also comfortable and worked well during our two weeks in the camper. I appreciated the long cushion that allowed me to stretch out. We found an outlet under the dinette in the perfect place to plug in our laptops. Nice touch.

Kitchen storage and counter space were plentiful for a truck camper this size. We also liked the round sink and tall faucet. Having a large storage drawer under the cooktop instead of an oven was another practical cost and weight saving decision. As we get more experienced with cooking in a truck camper, we use camper ovens more and more. That said, we didn't use a camper oven at all except to store pots and pans until the past couple of years. Could we live without the oven? We sure could. Did we appreciate the additional storage of the drawer where the oven would have been? You bet.

The three cubic foot refrigerator was smaller than we're used to, but it fit our normal round of groceries with ease. What we lost in space we gained in a lighter weight refrigerator. We can't all ask the manufacturers to make their campers lighter without being

open to options like a smaller refrigerator. This is a compromise I could live with as we never found the space in the refrigerator to be lacking. Sure, it's nice to have separate freezer and refrigerator sections, but this was perfect for what we needed. On the driver's side overcab entry was a standard cabinet with an open storage spot just underneath it. We used this for overflow items and found it to be very useful and practical. It also saves a little more weight by not having a door. We really liked it.

We also appreciated the storage under the overcab step-up. We put our sneakers in there when we were wearing sandals, or vice versa.

As always, little things make the biggest differences. For example, the overcab reading lights in the Wolf Creek are outstanding. Unlike too many other overcab reading lights, they are not too bright or too hot.

Some overcab reading lights make you wonder when the men in black will arrive to ask you exactly where you were on October 18th, 1972, and what you were doing there. We also appreciated that these lights were easy to move. I liked them pointed away, to give a more indirect and ambient light. On the passenger's side of the overcab, the Wolf Creek had what I would call a night stand. The front of the night stand had an opening and storage area where I placed my sweatshirts and jeans. Just like at home, I put some reading material and my iPod Touch (alarm clock) on the nightstand.

When we were plugged in, I really appreciated the outlet that was also with the nightstand. Personally, I prefer this nightstand to the traditional overcab-nose storage. The driver's side of the overcab nose had the traditional storage cabinet and Angela was so jealous of my nightstand. Did I offer to switch sides? No way!

For someone looking for an aluminum framed, hard-side, non-slide truck camper that will work with some half-tons and nearly every three-quarter ton truck, the 2012 Wolf Creek 850 deserves to be on your short list. This is an impressive camper from a company that understands truck campers and cares deeply about quality control. Congratulations Northwood on your new Wolf Creek truck camper brand and an impressive first camper with the 2012 Wolf Creek 850.

Features & Options

Standard Construction Features

Fully welded, thick wall aluminum frame construction
 One-piece corona treated continuous fiberglass
 Hot polyurethane laminated multi-layered substrate walls
 High density block foam insulation
 One-piece, seamless roof membrane
 Insulated compartment access doors
 Radius cornered, locking luggage compartment doors
 Extended cab-over design
 2-piece steel reinforced bolt-through tie down brackets
 Diamond plate knee wall armor

Standard Exterior Features

LED exterior lighting
 Entry assist handle
 Fiberglass, insulated entry door
 Screen door with kick plate
 Rain gutters with oversized down spouts
 Radius cornered windows with screens
 Dual battery capacity
 Dual LP tank capacity
 Park cable TV hook-up with RG6 cable
 Tinted safety glass windows
 Wide view rear window w/cover
 TV antenna
 Pre-wired for satellite
 Pre-wired for solar panel
 Pre-wired for stereo
 Pre-wired for fantastic fan
 Pre-wired for power jacks
 Truck storage access passage

Standard Interior Features

Residential quality cabinetry throughout
 Solid wood mortise and tenon cabinet doors
 Roller bearing drawer guides
 Solid wood drawer faces
 Residential wear floor covering
 Valance window treatments
 LED interior utility lighting
 110V outlets: 7 in the 850

Standard Kitchen Features

High output 3-burner cook-top
 Range hood with light and exhaust fan
 3 CU FT fridge w/ insert panels
 Acrylic residential-style sink
 High profile kitchen faucet
 Multiple drawers in kitchen cabinet
 Kitchen overhead storage cabinets
 Ventilating window at kitchen sink
 Dinette table

Large picture window at dinette
 Dinette storage with interior access
 Plush dinette cushions
 Laminated counter tops
 Designer décor border

Standard Heat, Power, & Water Equip.

Interior command center
 12V electrical system
 Deluxe 110V 45-amp power converter
 30-amp park power cord
 20K BTU auto-ignition furnace
 110V GFI circuit protected exterior patio outlet
 12V water pump system
 Hook-up for city water
 6-gal DSI gas/electric quick recovery water heater
 1- 20 lb LPG tank w/ regulator
 Durable polyethylene holding tanks
 35 gal fresh water tank 840 (incl. water heater)
 33 gal fresh water tank 850 (incl. water heater)

Standard Bathroom Features

Hand flush toilet
 Molded full height fiberglass shower stall
 Shower curtain with curved track
 Bath skylight
 Exhaust fan in bathroom
 Medicine cabinet w/mirror
 Toilet paper holder
 Fold-down clothes hanger

Standard Safety Features

GFI circuit protection
 Smoke alarm
 LPG leak detector
 Carbon monoxide detector
 Fire extinguisher
 Dead bolt lock on entry door
 Egress window (emergency escape)

Standard Bedroom Features

Inner spring mattress w/ bedspread
 Designer headboard
 Shirt wardrobe cabinet
 Night stand
 Bedroom reading lights
 Electrical outlets
 Privacy curtain in cab over
 Bedroom roof vent

Available Options

Large Exterior Folding Grab Handle
 Exterior Shower

CAMPER SAFETY TIPS:

More TORCLIFT

Use **TORCLIFT** frame mounted camper tie downs for greatest safety.

For your safety while driving, use mirrors that allow you to view past the camper to the rear on both sides. Trucks can be purchased with extended mirror options or you may purchase mirror extensions. Truck manufacturers state that you should not exceed the GVWR for the vehicle that carries your camper.

The configuration of your truck will determine what size camper your vehicle can carry. A dual rear wheel truck is advisable for Wolf Creek campers. Adjustable air bags will help to level your vehicle, transfer rear axle weight forward for comfort and safety, and are recommended for all Wolf Creek applications. Some states allow passengers to ride in the camper, but it is not recommended as there are no seat belts available. When driving in any adverse weather condition it is always best to reduce your speed. The pickup should be outfitted with a durable rubber mat liner to reduce shifting while traveling. The mat will also protect the truck bed and camper from scratching while loading and unloading.
