FIFTH WHEEL TOY HAULERS

Keystone RV  
Company

[KEYSTONERV.COM/FUZION](http://KEYSTONERV.COM/FUZION)

## CROSSOVER TO LUXURY

Today's "toy haulers" are a far cry from the industrial-looking man caves of a decade ago. The Fuzion fifth wheel toy hauler offers all the features of high-end conventional fifth wheels in addition to almost unlimited cargo hauling capability and convenience. These new models from Keystone can truly be called luxury crossover vehicles.

## 5K INTER-LOCK SYSTEM

Fuzion's 5K Inter-Lock system is the most rugged, toughest tie-down you can find in any toy hauler. Welded into the frame, each tie down can support 5000 pounds. Because your toys are important, be sure your new toy hauler is a Fuzion with the 5K Inter-Lock system.

Watch our exclusive video of the 5K Inter-Lock System being put the test!

## FUZION INTERIORS

The **FUZION GLIDE-A-BED SYSTEM** is an industry exclusive system that gives you full walk around convenience on our North / South King Bed floorplans. All King Beds are 72"x80" true residential size king beds.

Fuzion is the *FIRST* and *ONLY* toy hauler in the industry to offer this exclusive technology.

# FUZION CONSTRUCTION

*Superior construction to provide long lasting durability means you will*

## 6 POINT HYDRAULIC AUTO LEVELING SYSTEM

This system has the strength to lift 60,000 lb. off the ground-need to change a tire? No problem! Most importantly though, is the ease of use. One touch and the coach levels itself.

It also remembers the point at which you unhook from the truck so when it comes time to hitch back up-press a button and you are back at that height! Other brands use an electric system which is slower, weaker, and you have to pull the pins on all 6 legs to get them to drop!

Fuzion's Blizzard Package offers the best in the industry when it comes to high tech insulation. Don't be fooled by advertisements which claim "Tested to Zero Degrees". Ever ask them if it passed or failed? Fuzion's Blizzard Package is the real deal with R31 "Radiant Foil Technology". This insulation is used in the floor, wrapped around all of the holding tanks, used in the ceiling and wrapped around the front of the unit under the cap and in the gooseneck floor resulting in an R-factor of 24 under the bedroom. At Fuzion, we also use RFT R-24 in the slide rooms as well. To enhance the RFT's ability to maintain temperatures, we duct heat into the garage and the pass through compartment. This process exceeds most of the competition who claim the compartments are heated while it is only a heat duct passing through without a register delivering hot air! Fuzion also installs two attic vents helping to eliminate the possibility of condensation build up in the roof insulation.
